14 in	-	-	60 x 80 in	76 x 80 in	-

Nominal dimensions shown. Finished measurements may vary slightly by model and normal manufacturing tolerance.

Comfort & Performance

Cooling, pressure relief, support, and product-use essentials

1 Core Sleep Features

Cooling Comfort

Breathable comfort materials are designed to encourage airflow and help reduce heat buildup for a fresher sleep environment.

Pressure Relief

Comfort layers cushion key pressure points around the shoulders, back, waist, and hips to promote a more balanced sleep surface.

Responsive Support

Individually wrapped coils respond independently to body weight while helping limit motion transfer across the mattress.

2 Support & Everyday Performance

- **7-Zone Support:** Zoned pocket coils are arranged to provide differentiated support across key body areas.
- **Reinforced Edge Support:** A more stable perimeter helps improve edge confidence and usable sleep surface.
- **Motion Isolation:** Independently wrapped coils help reduce the transfer of movement between sleep partners.
- **Medium-Firm Feel:** Balanced cushioning and responsive support for a broad range of common sleep positions.

3 Materials & Safety

OK Fiberglass-Free Construction

OK CertiPUR-US Certified Foam

OK OEKO-TEX Certified Cover

OK SGS Tested Materials

4 Mattress-in-a-Box & Care Notes

- **Expansion:** Unbox, unroll, and allow up to 72 hours for the mattress to fully recover its intended profile.
- **Foundation:** Use on a proper, supportive foundation or compatible bed base. Inadequate support may affect comfort and durability.
- **Care:** Keep the mattress dry, use a mattress protector when preferred, and spot clean only unless the care label states otherwise.
