

# Slipcover Instruction Sheet

## Checklist of Included Items for Assembly:

Slipcover

- Seat Cover
- Seat Cover + Cushion Cover
- Seat Cover + Cushion & Arm Cover

### Step 1

Unfold the large slipcover. This is for the base. Lay it open side up on a clean surface. Take the Seat Base and flip it over so the bottom is on top and place it in the slipcover. Line up the corners and pull the slipcover up on all four sides. Once it is in place, take the excess fabric of the cover and fold it over the lip of the Base and attach it. See Illustration A.

Illustration A

### Step 2

Once the cover is secure, flip the Base over and place it in the frame making sure it fits snugly in the Seat Tray on all four sides. Insert the Back and/or Side Cushions into their slipcovers and place them on the Axis II Frame to complete your piece.

### Step 3

The Cushion Slipcover features straps that hold the back cushion in place. Affix the straps to the top bar of the seat back.
