FIGURE 1.

ASSEMBLY INSTRUCTIONS: PROCEDURE STOOLS

- 1) Remove base, pneumatic cylinder, seat, foot ring (optional) and casters from box.
- 2) Place base (1) upside down and insert casters (5) (see figure 1).
- 3) Insert pneumatic cylinder (2) as shown in (figure 3) into center hole of base with green button up and lightly push down.
- 4) Slide optional foot ring (4) over pneumatic cylinder (2) and tighten knob (7) at desired height.
- 5) Align the two holes on the bottom of (6) arm with the two holes on the bracket on (3) arm support and secure with the two shoulder bolts and washers supplied. (Note: there are two holes on both ends of (3) arm for the option of either being on the right side or left side).
- 6) Align center hole of (3) arm support with (2) pneumatic cylinder and slide down.
- 7) Align the center hole of seat (3) on the bottom of the seat (see figure 2) with the top of the pneumatic cylinder (2) and lightly push down. With the weight of your body, carefully sit on the seat. This will press the base, pneumatic cylinder, and seat together.
- 8) To raise the height of the chair simply pull up on lever (8). No weight or force is required.
- 9) To lower the height of your chair, while seated on chair, pull up on lever (8).
- 10) Get on it! Enjoy!
