

Installation steps

1. You need to find the location where you want to hang it
2. Use a mark to determine the punching position
3. There are installation tools in the package
4. After installation, you can put in 1*AA battery
5. Adjust the time and it can be used normally

Note:

1. If the size difference is 1-2cm, please understand that this is a handmade product and there will be small differences
2. If some patches are bent due to logistics delivery, you can try to gently straighten them by hand
