

SOLAR POWERED WOODEN LANTERN LIGHT

DEAR CUSTOMER,

Congratulations on your purchase. We are proud to provide you an ecological-friendly product of superior quality. Please read this instruction carefully before use.

1. First Time Use

If the solar panel is covered with a thin protective film, remove it before using the product.

Remove the solar puck from the lantern by aligning the arrows on the solar panel and lantern and then lifting the the solar puck. Press the button "ON/OFF" 3 seconds to turn the light on.

2. Two Charging Methods

● Solar charging

Place the lamp in an area where it can receive direct sunlight for at least 8 hours each day. It can automatically charge during the day and automatically turn on in the dark. Shadowed locations will not allow the battery to charge fully and will reduce the hours of nighttime lighting. The selected location should not be near nighttime light sources, such as porch lights, street lights or pool lights, as these may cause the solar light to turn off prematurely.

● USB charging.

It can also be charged by USB in bad weather (rain and snow). One USB cable (Type C) is included .

When the charging indicator turns green, the battery is fully charged. (During use at night, the product should be kept away from the background light, as this might cause the product turn off prematurely, too.)

3. Three - Color - Temperature to Choose

- Press the button "ON/OFF" for 3 seconds to turn on the light.
- Continue pressing this button to change the color temperature (2800K/ 4100k/ 6500k)

4. Three Brightness Modes

- Press the button "ON/OFF" for 3 seconds to turn on the light.
- Press the button "BRIGHTNESS" to select different brightness modes. Low 15% / Medium 50% / High 100%

5. Battery Replacement

- Remove the solar puck by aligning the arrows on the solar panel and lantern
- To open the battery compartment by unscrewing the 3 screws.
- Remove the battery cover then take out the old battery and replace with a new 3.7V/600mAh 14500 Lithium Battery.

Warning: Failure to insert battery in the correct polarity, may shorten the life of the battery or cause the battery explode or leak

- Replace the battery cover with screws to original position.
- Press the button "ON/OFF" for 3 seconds to turn on the light and replace the solar puck to the lantern.

6. Troubleshooting

If the light does not turn on at dusk after 8 hours of charging:

- Ensure that the solar light is in a bright sunny location and not in a shade area during the day.
- Make sure that the light's photocell is not affected by other light sources at night.
- Make sure that the switch is turned ON.
- Verify that the battery is making contact with the terminal and that it has been inserted in the correct polarity.

7. Warning

- Safe for outdoor operation.
- Failure to insert battery in the correct polarity, as indicated in the battery compartment, shorten the life of the battery or cause battery to explode or leak.
- Do not dispose of battery in fire
- Battery should be recycled or disposed of as per manufacturer's recommendations.
- Remove battery if consumed or if product is to be left unused for a long period.

For installation, please refer to the written instructions at the back.
