1

Open the box and take out all of the parts and hardware.

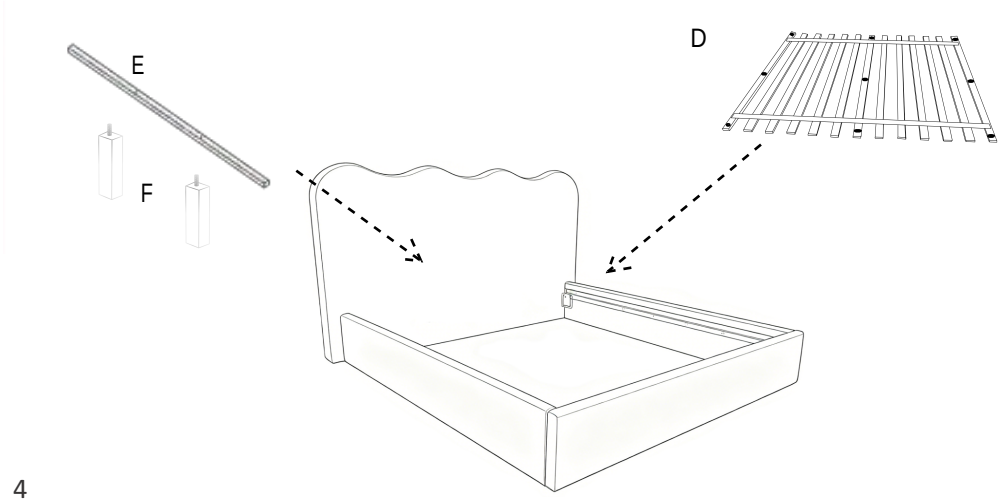

2

Attach the 2 siderails (C) to the headboard (A) and footboard (B) by sliding the metal plates on the siderails onto the screws as shown. The 2 metal pieces should be aligned. If its hard to install, you can unscrew the screws a little to attach the metal plates, then use the wrench (HW2) to completely screw in the screws.

3

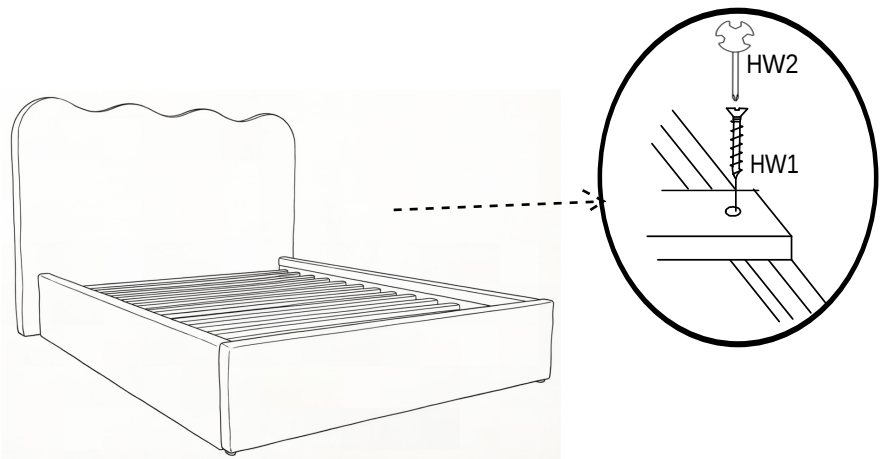

Screw the support legs (F) into the cross slat (E). Place them in the center of the bed. Place the slats (D) on top of the support legs as shown.

4

Attach the slats (D) to the bed by using the wrench (HW2) to screw in the 9 screws (HW1)

in the 9 spots shown in step 3.

5

Place the bed in the place where you will use it. We'd love to see it – just tag us (we're @safavieh) and use the hashtag #safavieh on Instagram!
