

Instruction Manual

**Electric Patio Heater
With Ashtray**

**Please read these instructions carefully before using
your new heater**

Unpack the heater making sure that all the items are present and that there are no components left in the box and that the heater head is free from any packing material.

Using the detailed drawing follow the steps to assemble your heater.

Do not connect the heater to the electrical supply until all the assembly is complete.

Do not connect the heater to the electrical supply if any of the components or the power cord is damaged in any way.

If in doubt contact your supplier.

Operation

Connect the power cable to a 13 amp supply that is located in a safe, dry area.

- The switch on the heater is used to control the Heating. (I) for 1500W. The 0 position is off.

- Although the patio heater is shower proof, do not use when raining

or in wet conditions.

- Always disconnect the power cable from the electrical supply, when the patio heater is not in use.

Care and maintenance

- When disconnected from the electrical supply, clean the outside of the patio heater with a damp cloth. Never use corrosive or solvent cleaners or immerse in water.
- Any maintenance or repairs including replacing the halogen tube should only be carried out by a qualified electrician or by a recommended service center.

Technical specification
