- 2. Handle
- 3. Power cord hook
- 4. Power cord
- 5. Clean water tank
- 6. Small brush
- 7. Dirty water tank
- 8. Hook for brush
- 9. Hose
- 10. Big brush
- 11. Hose hook

- 3 -

PREPARATIONS BEFORE USE

Open the clean water tank by turning the cover in anticlockwise direction and take.

Insert the handle and cable hook into the machine.

Put the hose hook in the correct position to push it from right to left, and it is fixed well when you hear a lock tone.

Insert the house into the machine and make sure the lock tap is well fixed.

Put suitable amount of water into the clean water tank. **WARNING: Donot exceed the max water level line.**

Align the solid circle of the tank cover with the hollow circle of the tank, with a clockwise rotation to close the cover until you hear a lock tone and insert it into the machine.

Assemble the brush as you may want.

Wrap the hose around the base and insert the hook.

- 4 -

HOW TO USE

Select the desired wash tool suitable for the flooring/surface and attach this to the hose handle.

Plug the power cord and press ON/OFF button.

Press the water-spray button to spray water.

Brush the unit back and forth to clean stains.

For spills always pick up the excess liquid before using water or solution.

Press the brush in the stains position to suck all dirty water.

Power it off after cleaning. Wrap the hose around the base and lock in the hook.

Notice: clean the dirty water tank after every use to avoid unpleasant smell

IMPORTANT: Over or under tilting the hand tool may result in poor water pick up.

- 5 -

HOW TO CLEAN STUBBORN STAINS

Use fabric detergent to clean stubborn stains. Make the water and detergent with a certain proportion to fill the tank to the full line mark, and then install the clean water tank to the machine

Open the water-in sealing pad, fill the clean water tank.

Put detergent into the tank.

- 6 -

CLEANING CARE AND MAINTENANCE

To prolong the life of your spot & stain cleaner and prevent blockages or problems occurring follow this guide.

Always carry out cleaning when the product has been switched off for a short period of time.

CAUTION! never clean the cleaner or any parts of it whilst the plug is switched on at the mains.

This appliance can be cleaned by wiping a damp soft cloth to keep the outside free of dirt including dust. Use a dry cloth to clean the power cord.

To avoid unpleasant damp smells clean both tanks and ensure they are fully air dried before storing and after every use.

Press the wash tool release button and pull to remove the tool from the hose.

Remove the clean water tank from the main cleaner.

Pour water out of the tank.

Re-install the empty clean water tank and over on, press the water-spray button to remove any excess water from the tank.

Remove the wash tool brush cover to clean by rinsing under the tap. To replace, place cover into position on the wash tool until it clicks into place.

Remove the dirty water tank from the main cleaner.

- 7 -

Empty the dirty water tank after every use or when the water level reaches the max fill line. The float inside will prevent suction if the tank is full.

Open the dirty water tank and take out the cover and filter.

Remove small foam filter to clean by rinsing under the tap. Ensure this is fully dry before replacing and using in the appliance. TIP! Place on or near a radiator to dry.

Clean all parts with warm water only. Do not use washing up liquids or other chemicals.

Reinstall the dirty water tank into place on the cleaner.

- 8 -

QUESTIONS

Please read below table carefully before contacting the maintenance agency to avoid any unnecessary losses.

Fault	Possible Reasons	Measures
No working after turning on	• The plug is not well plugged • The cord is damaged	Turn if off, plug in well, or consult the service agent via hotline
No water comes out or little water comes out after pressing the water-spray button	• Spray water mouth is blocked • The handle or the pump has been damaged	Take out the brush, wash the spray water mouth or consult the service agent via hotline.
No suction or weak suction power	• The machine is not on • The dirty water tank is full • The hose is not in good status • The wind-in sponge is blocked	Turn on the power. Clean the dirty water tank to use it again. Check the hose to make sure it is in well status. Clean or change the sponge.
