

SmartHome WiFi 40W LED Dimmable MultiColor Light Bulb

.....

Equipped with remote management, voice activation and color changing features you can control from your smartphone.

Compatible with Alexa and Google Assistant.

Overview:

Illuminate your home with the SmartHome WiFi 40W LED Dimmable Multicolor Light Bulb. Turn on your lights from anywhere in the world with your smartphone using the free remote management app. Increase the security of your home by giving the appearance someone is always home. Using the smartphone Eco4Life mobile app, you have full control of your lights including adjusting the ambiance, using the dimming feature or even changing the color completely. Change the color to red for a spooky Halloween scene or green for festive Christmas lights - enjoy all colors on the color wheel.

Compatible with Alexa and Google Assistant, control your SmartHome LED Light Bulb with only your voice. As Daylight Savings comes and goes, create a lighting timer within the mobile app to automatically turn on your light at the optimal time. There is no limit to the amount of light bulbs you can control on your smartphone app . The Smart Home LED Light Bulb is easy to set-up and requires no extra hub or device. All you need is a lighting fixture, smartphone and a WiFi network and you're good to go.

Features:

- Control your light bulb from anywhere using the smartphone app
- Change light to any color on the color wheel and dim to any brightness
- Use voice control to power on/off your light bulb with Amazon Alexa or Google Assistant
- Schedule your lights to go on or off depending on your unique preference
- Group multiple light bulbs together and turn them off with one swipe on your eco4life App
- 1 year limited warranty
