1/2" Emerald Green Luster Fire Beads

Did you know that the emerald is one of the most popular gemstones in the world? In fact, they have been cherished by many cultures worldwide for thousands of years! The emerald was one of Cleopatra's favorite pieces of jewelry and it is clear why... the green emerald is a stunningly beautiful stone and immediately captures the imagination of all those who behold it. Now, your customers can bring the beauty of the emerald to their homes with our emerald green luster fire beads!

Truly reminiscent of shiny green emeralds, these luscious green glass beads are sure to impress your customers' visitors. This luster variety is infused with silica which gives the beads an additional warm glow. Our emerald green luster fire beads will go well in almost any decor, but will do especially well with earth color surroundings. They may be used alone, or mixed with other complementary colors for a completely unique look. When the fire feature is lit, all eyes will immediately be drawn to the magical display of bright shiny emeralds, reflecting and enhancing the bright yellow light of the flames dancing above them. Enchanting!

A Practical Alternative to Ceramic Logs & Stones

Our emerald green luster fire beads aren't just gorgeous to behold, but also very practical. They do a wonderful job of covering the entire floor of a fire feature, effectively hiding the unseemly pipes and tubes which are often visible in gas fireplaces or fire pits. This makes fire beads a much more desirable alternative to the commonly seen ceramic logs and fire stones.

Extremely Durable, Safe, & Long Lasting!

All our fire beads are manufactured using high quality glass and undergo a unique 5-step manufacturing process that renders them their beautiful shine and also allows them to withstand

temperatures of up to 1300 degrees Fahrenheit without sustaining any damage or discoloration. Used correctly, these magical beads could last your customers a lifetime!

Another advantage of our emerald green luster fire beads is that they do not emit any ash, smoke, soot, or harmful chemicals. This means they require hardly any cleaning and are very easy to maintain.

If your customers are looking for something enchanting for their next get together, introduce them to our emerald green luster fire beads!
