

Assembly Instructions for Massage Bed

Parts List

Step 1: Attaching the Feet (as shown in Figure 5). Take the two bed legs and insert them into the designated holes in the middle of the bed frame. Ensure that the legs are fully inserted and securely in place. **Installing the Shelf (as shown in Figure 6)** using the screws from Figure 2. Position the shelf on top of the middle bed leg. Align the screw holes on the shelf with the corresponding holes on the bed leg. Insert the screws through the holes, but do not tighten them completely at this stage. Ensure that the bottom of the middle metal pipe is level.

Step 2: Attaching the Single-Side Welded Nut Leg to the Opposite Side of the Shelf using the screws from Figure 2 (do not tighten the screws completely at this stage) and inserting it into the holes of the bed frame. Take the leg with the single-side welded nut and align it with the opposite side of the shelf. Insert the screws from Figure 2 through the corresponding holes on the leg and into the shelf, but do not tighten them completely yet. Ensure that the leg is securely attached to the shelf. Insert the leg with the attached shelf into the designated holes on the bed frame.

Step 3: After connecting the other bed leg, proceed to install the second shelf and the remaining two bed legs. Finally, use the wrench from Figure 3 to tighten all the screws. Take the second shelf and align it with the remaining two bed legs. Insert the screws from Figure 2 through the corresponding holes on the legs and into the shelf. Do not tighten them completely yet. Ensure that the shelf is securely attached to the bed legs. Insert the bed legs with the attached shelf into the designated holes on the bed frame. Ensure that all the components are properly aligned and positioned. Use the wrench from Figure 3 to tighten all the screws on the bed legs and shelves. Start from one end and work your way to the other, gradually tightening each screw. Ensure that all screws are securely tightened for stability and safety.

Step 4: To ensure a tight fit of the bed legs, follow these steps: Carefully lift the bed upright, with the help of another person if needed. Firmly press the bed legs downward towards the floor, giving them a few taps to ensure they are securely inserted. Once the foot end is secure, lift the head end of the bed. Apply pressure to the bed legs, pushing them firmly into the floor to ensure a tight fit. Make sure all bed legs are properly seated and securely in place. By performing these steps, you can ensure that the bed legs are tightly inserted, providing stability and support for the massage bed.

Step 5: To raise the backrest, follow these steps: Lift the backrest of the massage bed to an upright position. Take the L-shaped support rod from Figure 1 and insert it into the plastic component provided. Align the bottom end of the L-shaped support rod with the circular hole on the bed frame. Insert the support rod into the hole until it is securely in place. Once the support rod is properly positioned, use the screws provided to lock it in place. Tighten the screws securely using a screwdriver or the appropriate tool. By completing these steps, you will have successfully raised the backrest and secured it to the bed frame, allowing for comfortable usage of the massage bed.

Step 6: Place the Storage Board from Figure 7 and the Pillow from Figure 8. Congratulations! The assembly of the massage bed is now complete.
