Simple Assembly Instructions – Please keep for future reference

Finished

IMPORTANT

1. *Read these instructions carefully and familiarise yourself with the procedure before assembling the unit.*
2. *Check that you have all the component parts and familiarise yourself with each part before proceeding.*
3. *Take all the fittings out of the plastic bag and separate them into groups.*
4. *Ensure you have enough space to lay out all the parts before assembly.*
5. *To avoid scratching it is recommended that you assemble the unit on a soft level surface.*

⚠WARNING: To avoid serious personal injury:

• Carefully and strictly follow assembly instructions. Improper assembly of furniture can result in structural failure, instability of the product, or tip-over.

• Monitor and carefully control the assembly components. These include small parts and hardware that may present a choking hazard to small children. Bob's Furniture should be assembled only by responsible adults and children should not be involved in the assembly process.

• Where provided, wall mounting hardware should always be used as prescribed in these instructions to anchor furniture to walls. Proper use of the wall mounting hardware can significantly reduce the potential for furniture tip-over and crushing injuries.

CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.Note: This equipment has been tested and found to comply with the limits for a ClassB digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
