Vanity Care Guide

Vanity Care

- Avoid direct contact of sharp objects as they can cause exterior damage.
- Do not expose directly to the sun as it can cause aging and cosmetic damage.
- Avoid placing hot objects onto the vanity surface.

Countertop Care

- Kindly note that all our tops are sealed before shipping but may stain, scratch, or chip because they are porous by nature.
- Do not place hot items directly on the countertop as it can damage it.
- To prevent ring marks or staining, dry immediately.
- Place table mats beneath objects that can potentially scratch the surface.
- Use a clean, soft fabric to dust the vanity.
- Occasionally wash with a cloth dampened in warm water. If needed, apply a small amount of mild dishwashing liquid or stone soap to clean. Dry with a soft cloth.
- Refrain from using chemical cleaners,sprays,abrasive cleaners, or products that contain lemon, vinegar, or other acids.
- We advise to reseal top annually or when necessary.

For Minimal Stains:

1.Try gently cleaning with water and mild soap with a microfiber cloth.
2.If marks remain:Try gently scraping off the mineral build up with a brand new razor blade.

For Tough Stains or Cloudy Spots:

3.Try a pH-balanced cleaner safe for composite surfaces.
4.If marks remain:

- Lightly buff with water using ultra-fine steel wool (0000 grade) or high-grit waterproof sandpaper(1000+grit).
- Follow with a stone-safe polishing wax to restore shine.
- Always test in a small area first.

Note: These steps should be done gently to avoid dulling the surface. Contact us if a polishing wax is needed.

Cleaning and maintenance

- Avoid using cleaning products that contain Bleach or Ammonia.
- Please use wood–friendly products on wooden base vanities.
- To adequately clean exterior surfaces, use natural cleaning solutions or soap
