Assembly Steps

Overview

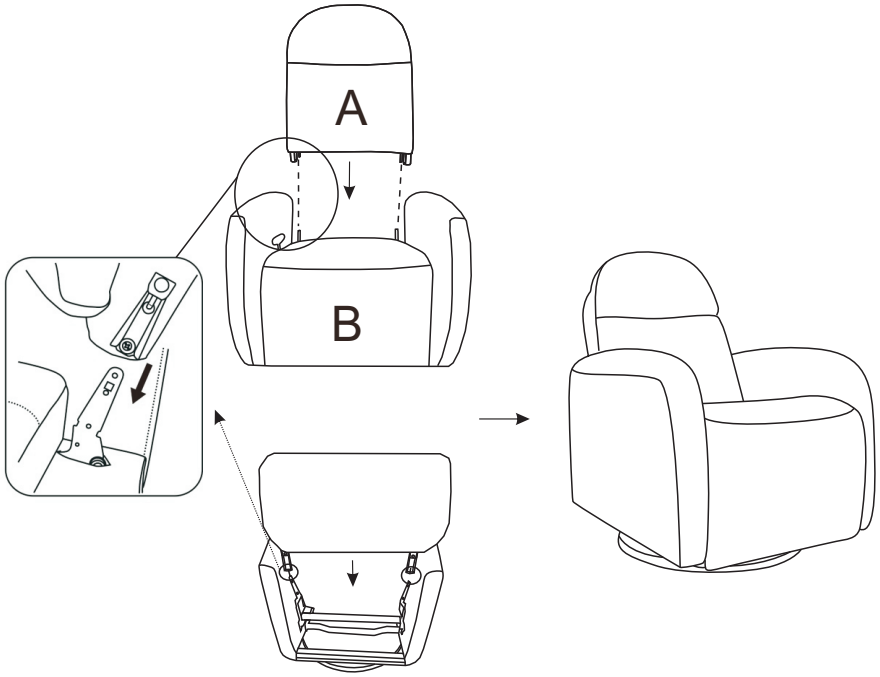

This recliner has multiple parts and may require upto 10 minutes to assemble

To give you an overviewof the recliner parts, the above picture is to help youput the various parts into perspective.

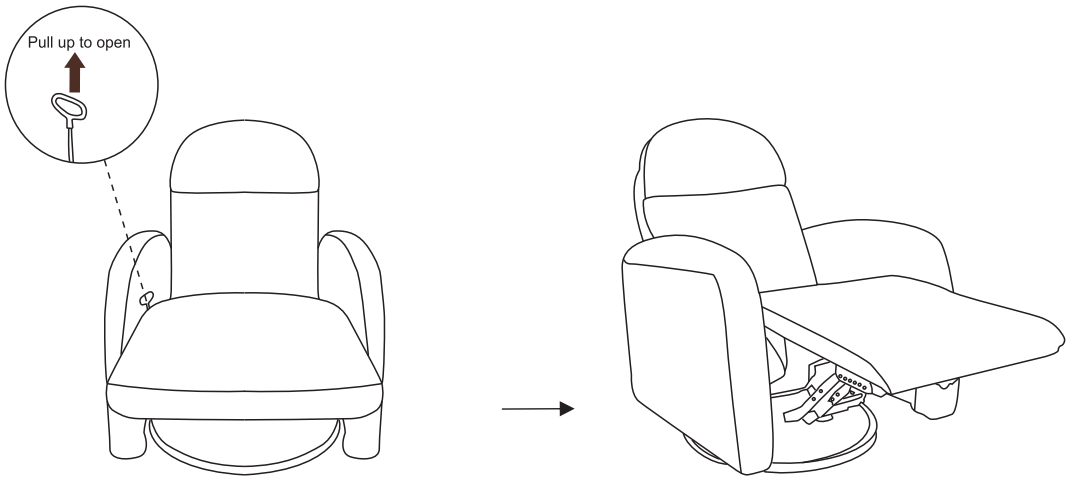

Please readthrough the instructions below to familiariseyourself with the parts and steps before assembly

Step 1

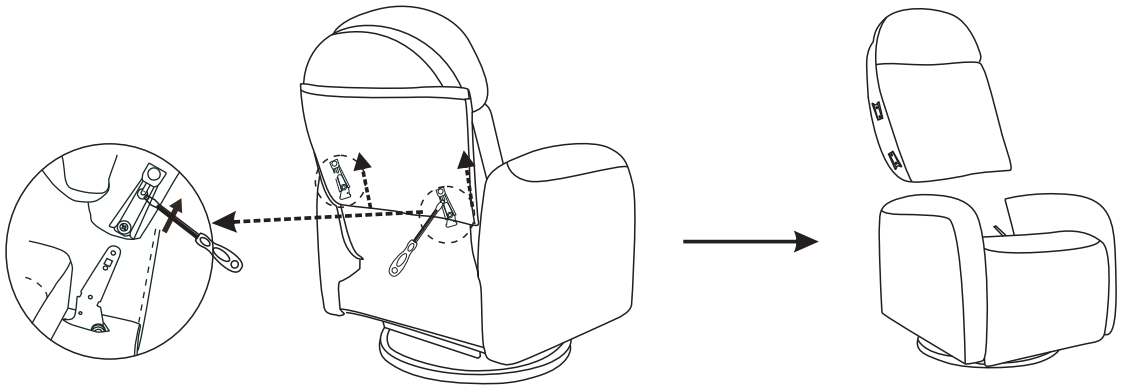

Assemble the Seat backrest(A) to the chair base(B)

Step 2

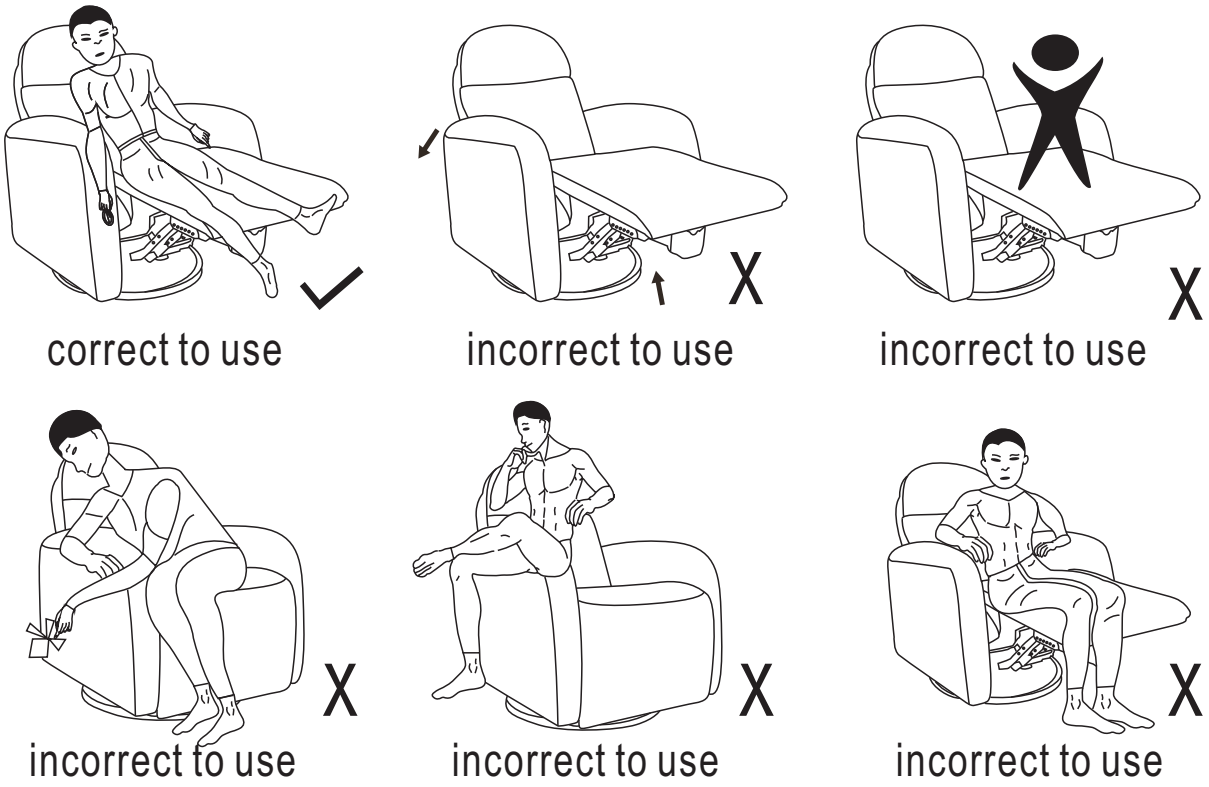

Your Recliner is ready for use.

This Recliner can only be used on a flat,level surface.

Disassembly Note:Open the flap on the chair backrest (A).
Use a screwdriver (do not use fingers) to press outward on the locking mechanism on one side of the chair base (B). Have an adult helper hold the chair base (B) steady, then pull the chair backrest (B) upward at the same time. Repeat the step on the other side. The chair backrest (A) can then be removed.

Warning!!

mechanism and any gaps. Do not allow children to play on the chair. Do not lean to side to pick up anything while sitting on the chair. Do not sit on the arms. Do not stand up when the recliner open. Only the occupant should operate the chair.

Questions & Answers about Proposition 65

• What is Proposition 65?

Proposition 65 requires businesses to provide warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm. These chemicals can be in the products that Californians purchase, in their homes or workplaces, or that are released into the environment. By requiring that this information be provided, Proposition 65 enables Californians to make informed decisions about their exposures to these chemicals.Proposition 65 also prohibits California businesses from knowingly discharging significant amounts of listed chemicals into sources of drinking water.Proposition 65 requires California to publish a list of chemicals known to cause cancer, birth defects or other reproductive harm. This list, which must be updated at least once a year, has grown to include approximately 900 chemicals since it was first published in 1987.• What types of chemicals are on the Proposition 65 list?The list contains a wide range of naturally occurring and synthetic chemicals that include additives or ingredients in pesticides, common household products, food, drugs, dyes, or solvents. Listed chemicals may also be used in manufacturing and construction, or they may be byproducts of chemical processes, such as motor vehicle exhaust.

• What does a warning mean?

If a warning is placed on a product label or posted or distributed at a workplace, a business, or in rental housing, the business issuing the warning is aware or believes that it is exposing individuals to one or more listed chemicals.By law, a warning must be given for listed chemicals unless the exposure is low enough to pose no significant risk of cancer or is significantly below levels observed to cause birth defects or other reproductive harm.• Where can I get more information on Proposition 65?If you have specific questions on the administration or implementation of Proposition 65, you can contact OEHHA's Proposition 65 program at P65.Questions@oehha.ca.gov, or by phone at (916) 445-6900.
