

ASSEMBLY INSTRUCTIONS

Tips: wipe it gently with a damp cloth and the water in the fountain needs to be changed regularly

Step 1: Remove the fountain from the box; place the product on a level surface.

Step 2: The LED light is pre-installed in fountain. Plug the LED light into the pump (A).

Step 3: Connect the PVC plastic tube to the outlet nozzle of pump (A). Place the pump (A) flat inside the bottom of the water tank. Ensure the power cord passes through the back opening.

Step 4: Fill the product with clean water. Make sure the pump (A) is completely submerged in water. The fountain is completely assembled as shown in Fig. 2. In order to have best effect; the water level should be 3/4 inch (2 cm) below the top of the Basin.

Step 5: Plug the pump power cord in the wall outlet to run the fountain.
