installation steps

YouTube install video

Install the lower front and rear reinforcement rods.

Insert the backboard into the slot at the back of the side shelves, front top to bottom, and install the backboard.

Install the middle reinforcement bar on the back.

Install the upper back panel. Note: The double door model has a raised back panel with holes ① while the single door model has a raised back panel with holes ②.

Install the top back reinforcement rod.

Insert the front top reinforcement rod into the top hole, do not tighten it.

Clamp down tight.

Insert the top and bottom boards at the hooks of the layer board on the side shelves, and place the inner layer boards at the horizontal pipes of the side shelves.
Note: The adjustable inner layer board needs to be inserted with the layer board buckle into the adjustable height hole on the side frame and tightened to support it, and then placed into the layer board.

Install the back panel plug. Note: Double doors do not have them.

Install cabinet door handle. Tear off the handle adhesive diagram and stick the handle to the appropriate height position on the vertical strip of the cabinet door.

Install casters. Screw the casters into the threaded plug base at the bottom of the side frame. Attention: During installation, support the cabinet to prevent tipping. Finally, remove the protective film from the cabinet door to complete the installation.
