

Ultimate Innovations Glass Hummingbird Feeders

Roxanne's Hummingbird Nectar Ingredients:

- * 1 Cup Refined Sugar
- * 4 Cups Water

Directions:

Mix sugar and water together and place in a microwave safe dish. Microwave on high for 5 minutes or until sugar is dissolved. Nectar may also be made on the stove top by slowly bringing mixture to a boil in a sauce pan to dissolve sugar. Carefully remove from microwave or stove top and allow mixture to cool. Twist off base and fill. Replace base and hang with included hook.

To clean: Twist off the base and hand wash with warm soapy water. Do not use bleach or any harsh chemicals to clean in order to avoid contaminating the hummingbird nectar. Use included brush to clean inside of feeder and feeding ports. Always wash before each use. Not dishwasher safe.

Fill with sweet nectar and hang with the included metal hook (located on the side of the styrofoam packaging).

Hummingbirds feed from the four ornate feeding ports.

Please do not use Red Dye in your nectar as it may harm the birds.

Hummingbirds will be attracted to the feeders red flower on the tray. Enjoy
