日常清洁&保养：

Sofa Care & Maintenance

A:Daily Cleaning

- Use a clean&soft cloth or vacuum regularly to remove dust and debris.
- For faux leather sofas, wipe with a slightly damp soft cloth and then dry with a dry cloth.
- For fabric sofas, use a suitable fabric cleaner for spot cleaning.

B:Daily Care

- Avoid Direct Sunlight

Prolonged exposure to direct sunlight may cause fabric fading and leather cracking.

It is recommended to place the sofa away from direct sunlight or use curtains/blinds to block it.

- Spill Management

Immediately blot spills with a clean absorbent cloth (do not rub) to prevent liquid penetration into fibers.

For stubborn stains, use a professional cleaner and test it first on a hidden area.

- Cushion Care

Regularly flip and pat cushions to keep them fluffy and evenly supported.

Avoid sitting in the same spot for extended periods to prevent sagging.

- Frame & Leg Check

Check screws and connectors every 3-6 months to ensure stability.

Lift the sofa when moving; do not drag to avoid damaging the base structure.

- Avoid Harsh Chemicals

Do not use bleach, alcohol, or abrasive cleaning tools to avoid damaging fabric surfaces.
