# Umbrella

Cantilever

Large 10-ft cantilever freestanding patio umbrella with unique Coolaroo® knitted fabric that provides up to 90% UV block while letting air flow through the fabric reducing temperature underneath by up to 32%. It is easy to clean and mold and mildew resistant. The sliding 'Banana Arm' design allows the umbrella to be used in a number of positions from horizontal to 70° upright. The aluminum poles and arms are robust, corrosion free and lightweight, and the powder coated steel ribs provide excellent strength. Plus, the aluminum cross beam stand is designed to work with the optional Coolaroo® umbrella base, standard paving slabs or it can be fastened with screws.

- 10-ft canopy provides approximately 75-ft<sup>2</sup> of cover
- Knitted HDPE fabric provides 90% UV block
- 5-year warranty on fabric against UV degradation
- Light weight aluminum poles, base and arms
- High strength steel ribs
- Base integrates with Coolaroo® water base, standard slabs or screws **(not included)**
- All metal work powder coated
