### THE BONN COLLECTION

The Bonn Collection has a luxe aesthetic and a minimalist personality. It is a well-constructed, cost-effective, high performance collection. Express lead times and extensive customization options add to its popularity. The versatile solids can be used to create visual dimension, while remaining neutral. Additional bold and custom color options offer the capability to make a strong visual statement in an otherwise neutral setting.

- **Availability** - Made to order.
- **Size, Shape, & Color** – Any non-standard size can be made, as large as 20' w x 50' l. Odd shapes and cut-out shapes can also be customized. Colors can be customized.
- **Installation** – Area rug options are available in virtually any size. Additional wall-to-wall installation options available, with some width and orientation restrictions.
- **Lead Time** - 8-10 weeks, often a few weeks longer for extra-large sizes.
- **Custom Cost** – A custom upcharge applies for custom colors, cut out shapes, rush orders, and extra-large sizes (over 13' wide or over 20' long).
- **Weave** – Hand-loom
- **Construction** – Belfast & Berlin designs are made of 100% bamboo silk. Bern, Beja, and Bactra designs are made of 100% tencel. Bamboo silk and tencel are good cost-effective alternatives to silk. Bamboo silk and tencel are good alternatives to viscose, because they are resilient towards water spills and foot traffic. Bamboo silk is a semi-natural fiber, made from wood or bamboo pulp. It is considered a recovered fiber because it is made from reformed cellulose. Barri designs are hand-knotted with 100% wool. Wool contains lanolin, an inherent stain repellent.
- **Treatment** – Bonn collection rugs respond well to Fiber-Seal, in case of dramatic scenarios, such as red wine spills on light color rugs. Stain treatment is not necessary, only an extra precaution. Please contact Fiber-Seal for inquiries.
- **Care** – Spot clean spills and stains with baby wipes, dish soap foam, or seltzer water. Vacuum regularly. Avoid using a beater-brush vacuum. Do not use in-house furniture cleaning services for cleaning area rugs. Professionally clean, if needed. Good quality, hand-made rugs are meant to be low maintenance.
- **Performance** –Bonn Collection rugs perform well in high traffic residential settings, offset corporate and hotel settings, and offset public areas. Our hand-loom rugs are well-constructed and resilient, performing well for approximately 4-13 years, depending on the amount of use and the nature of application.
