

Step 4:

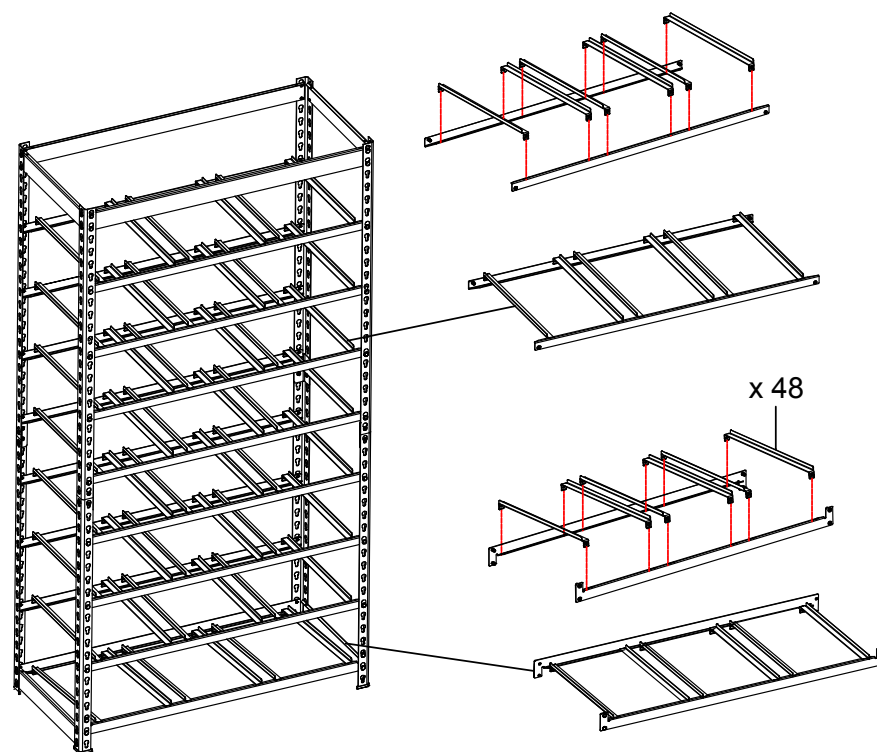

Set up the layers.

- Add the mini long beams to the post in parallel, at the #7, #12, #17, #22, #27, #32 & #37 hole from the top.
- Leaving the space of 4 holes each tier for the bins.
- Let the "V" shape slot heading down at the front while heading up at the back.

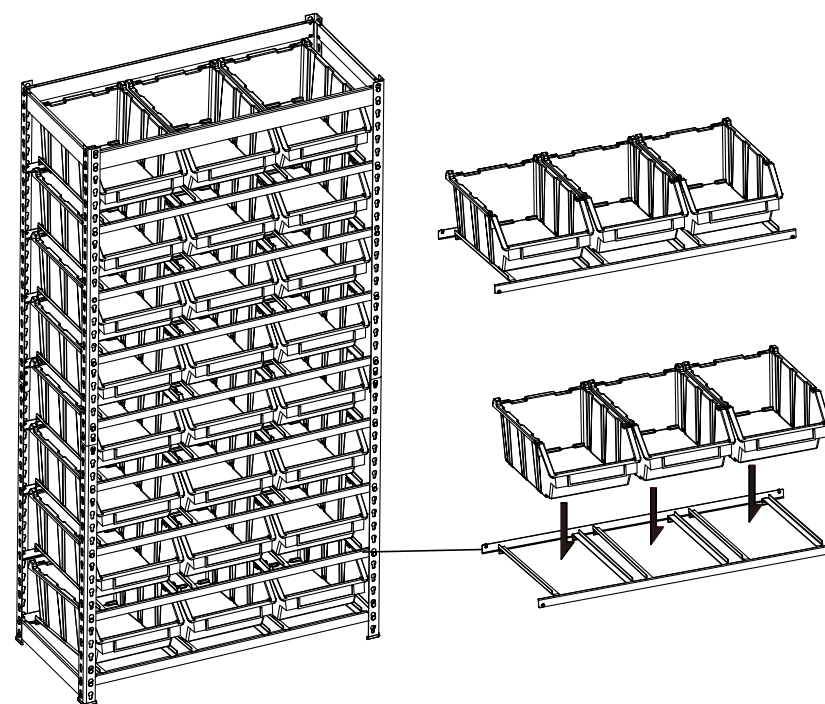

Step 5

Mount the rails to the mini beams accordingly.

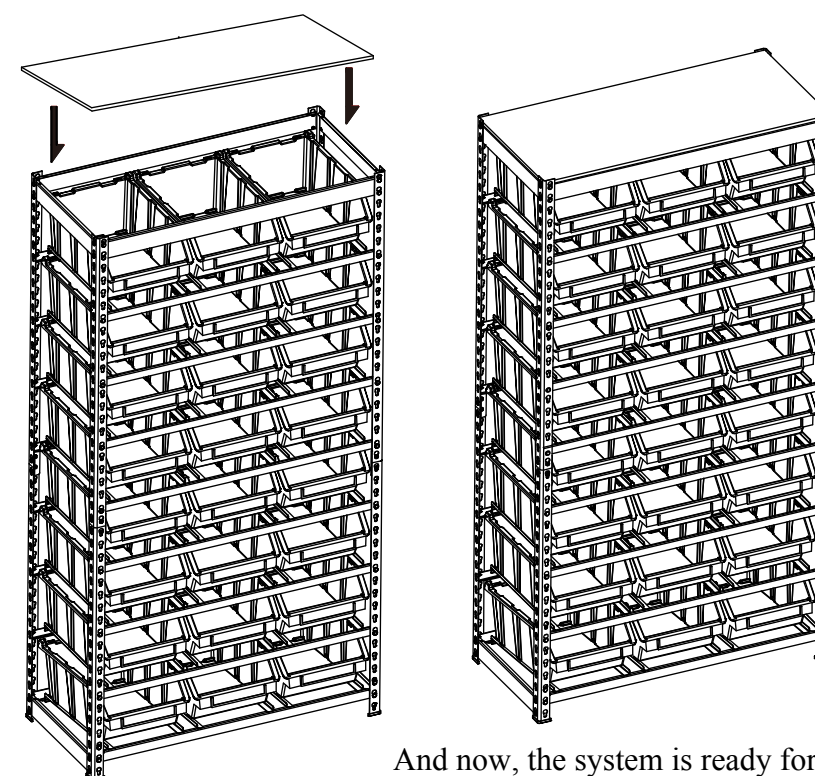

Step 6

Put the bins on the rails.

Step 7:

Place the wooden board on the top.

And now, the system is ready for use.
