THE DISCOVERY OF 21ST CENTURY DESIGN VOCABULARY

There are moments along the time line of history when accepted design standards are turned on their head and a new design vocabulary for the ages emerges. Sometimes this transition is organic and evolves over time and sometimes this discovery is sudden and credited to a small group of brilliant visionaries coming together with a common calling.

For the 20th Century, we all know early English design vocabulary, Art Deco, Art Nouveau, Bauhaus design, the 1950s and Memphis. Since the 1970s, reinterpreting the classics of the past has been as close as the design community has come to finding a new approach to design. By enlisting the design giants of our time, Cooper & Graham is discovering the design vocabulary of the 21st Century.

EMILE

Emile is an elevated and refined assortment of trims and hardware that draws its inspiration from the gracefulness of flight, with design nods to wing tips, dials, and meteorological symbols.

Breaking general standards for length, EMILE proudly holds its own in any modern space with its exaggerated proportions and elegant upturns.

Each piece in the collection celebrates the romanticism behind travel: the moment before taking off, the ethereal feeling of ascending in the air - wings up.

FAUCETS

EMI-10200

EMILE
8" Widespread Lavatory Faucet

AVAILABLE IN:
#CP - POLISHED CHROME
#BN - BRUSHED NICKEL

EMI-10400
