N types of product styling designs, the same perfect installation method

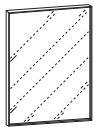

INSTALLATION MANUAL

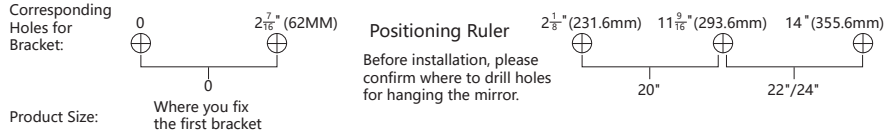

If you have any problem, please feel free to contact us on aftersale

INSTALLATION SEQUENCE

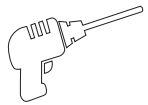

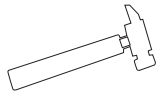

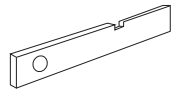

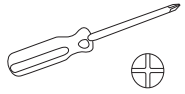

⚠ **Note**: Ensure that the fixing location is able to take the weight of the complete fitting .

Packing list

 Mirror x 1	 Bracket x2&3	 Screws x(4&6+2)	 Wall anchors-(4&6+2)	 Wall anchors-(4&6+2)

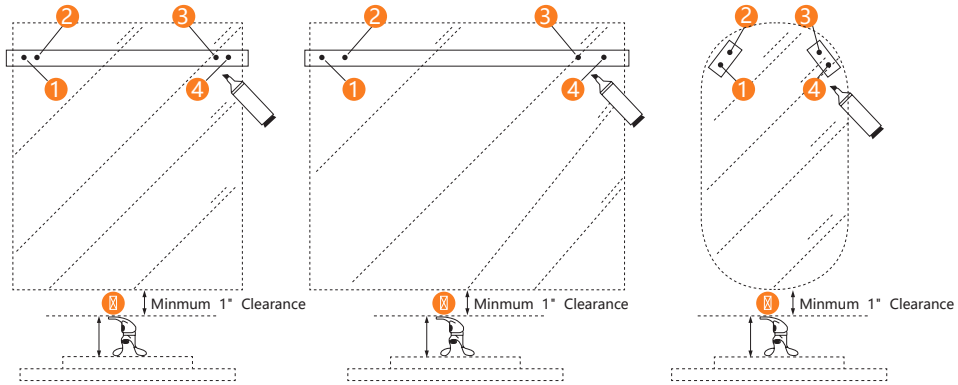

Installation tools

 Electric Drill	 Hammer	 Marker Pen	 Tape Measure
 Level	 Phillips Screwdriver	 Safety Goggles	

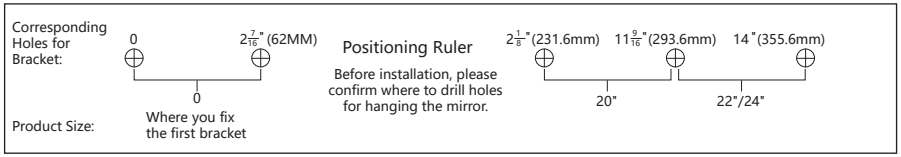

1. Decide the installation method as per your reference. Confirm the locations for drilling holes with the positioning ruler, and use a marker to mark the spots 023 on the wall.

Vertical Installation | Horizontal Installation | Arc-shaped installation

Note: Please hang the mirror a few inches above the highest part of the faucet.

How to Use the Positioning Ruler:

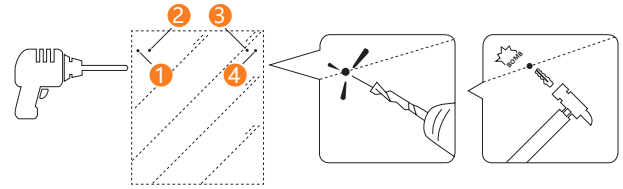

The positioning ruler makes it easier for you to drill perfect holes for the brackets.

① Decide the location to hang your mirror first, and make sure the positioning ruler is placed against the wall horizontally.

② The lower line is product size. According to your product size, you can find the corresponding hole spots for the two brackets, which are indicated on the upper line.

2. Use an electric drill to punch holes at the marked spots, and then apply wall anchors with hammer.

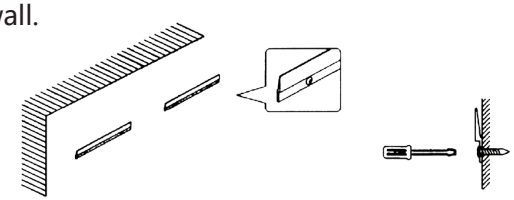

Thickness of wall > 16mm  (1/4" (6mm) drill bit, drilling depth in 1 31/32"(50mm))

Thickness of wall 8 ~ 16mm  (25/64" (10mm) drill bit)

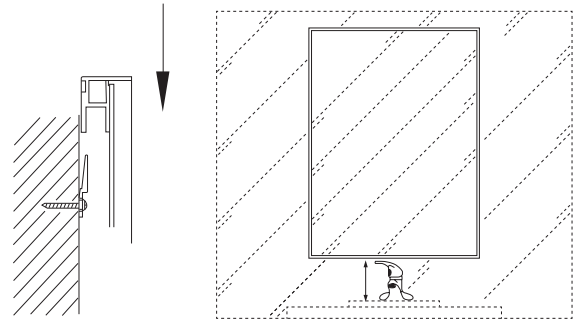

Thickness of wall < 8mm **Unapplicable**

⚠ **Note:** Please wear goggles and pay attention to safety.

3. Screw the two brackets on wall.

4.Place the mirror against the wall, align the hook with the bracket slot, slowly lower it so that the hook fits into the slot, and gently shake the mirror to ensure that the mirror is securely installed.

⚠ **Note:** Two-person installation.
