safety and
care advice

- Check you have all the components and tools listed.

- Remove all fittings from the plastic bags and separate them into their groups.

- We do not recommend the use of power drills/drivers for inserting screws, as this could damage the unit. Only use hand screwdrivers and Allen keys.

- Keep children and animals away from the work area, small parts could cause choking if swallowed.

- Make sure you have enough space to layout the parts before starting.

- Assemble the item as close to its final position (in the same room) as possible.

- Do not overtighten the nuts to avoid causing damage to the threads.

Please check you have all the panels listed below
