

INSTALLATION INSTRUCTION

Circular mirror

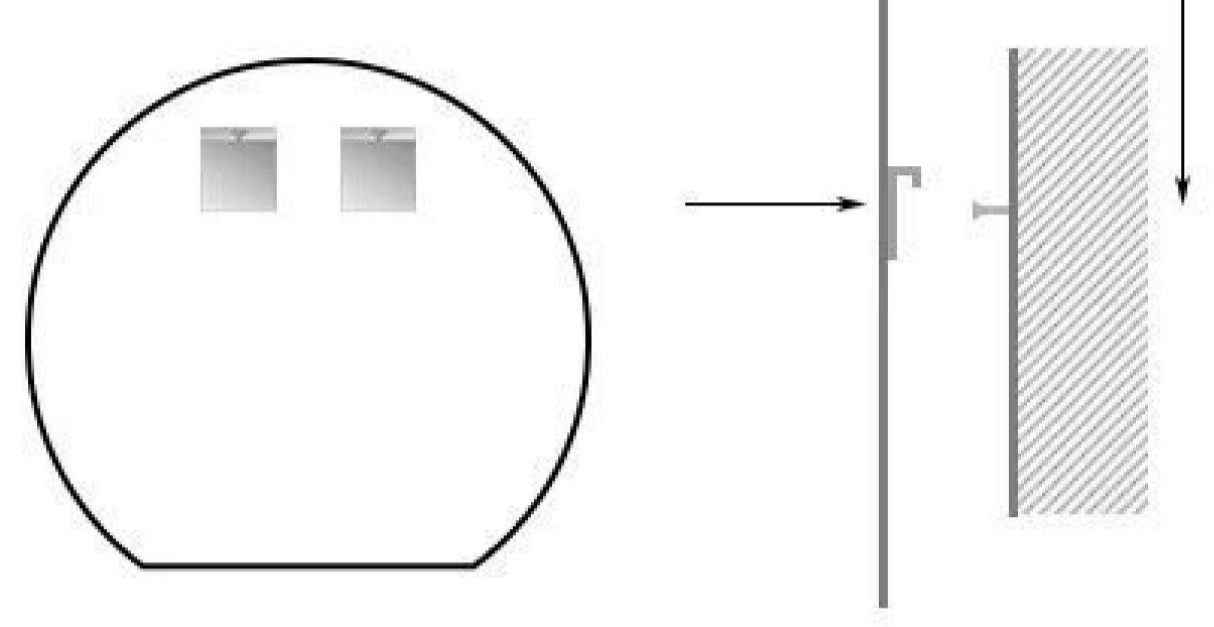

1 Prepare mirrors and installation tools

2 Punch 6-8MM/0.23-0.31inch holes on the wall and screw in Wall plug and hook

3 Hang the mirror hanging piece onto the hook

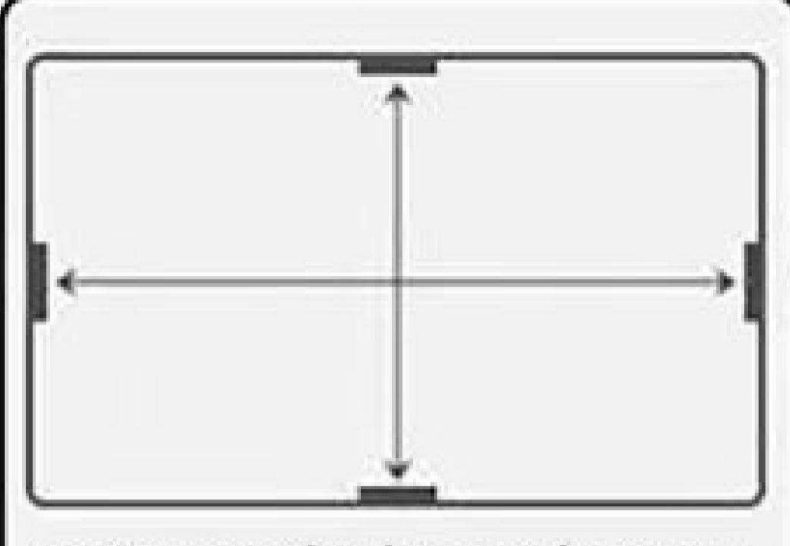

Rectangular mirror

The installation requires the following tools

Tape measure Pencil Electric drill Hammer Screwdriver

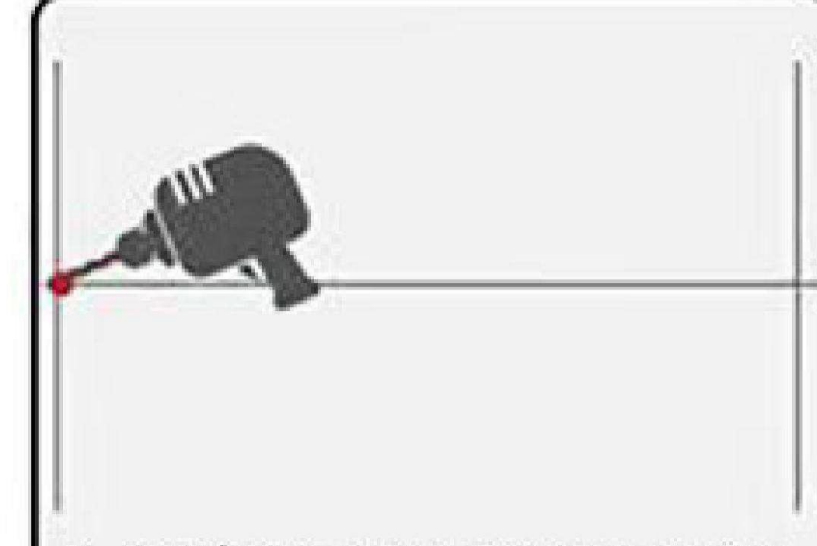

1. Measure the distance between two hooks with a tape measure

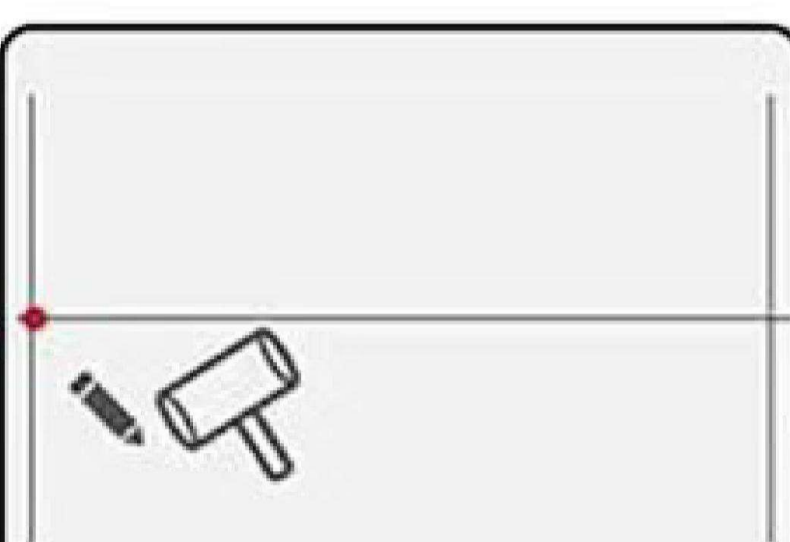

2. Draw a straight line on the wall with a pencil, and the intersection point is the punching position

3. Drill holes at intersections using an electric drill

4. Install Wall plug

5. Screw in the screws with a screwdriver

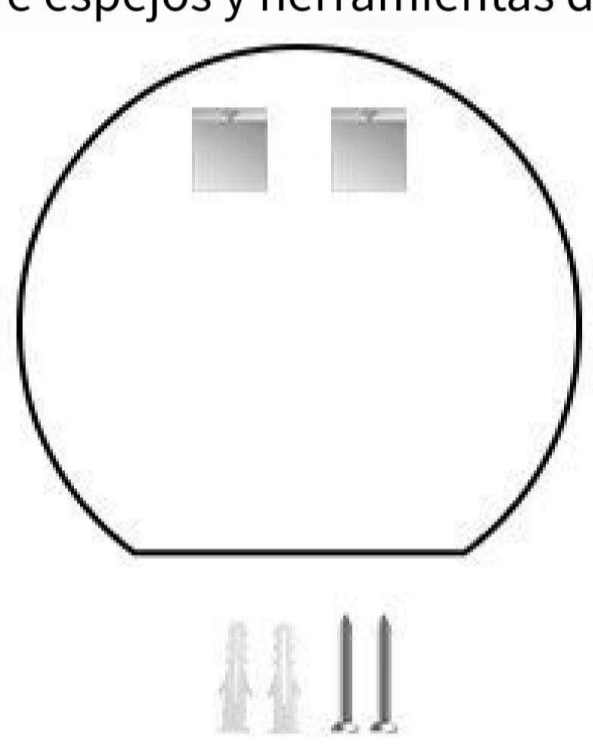

6. Mount the mirror and complete the installation

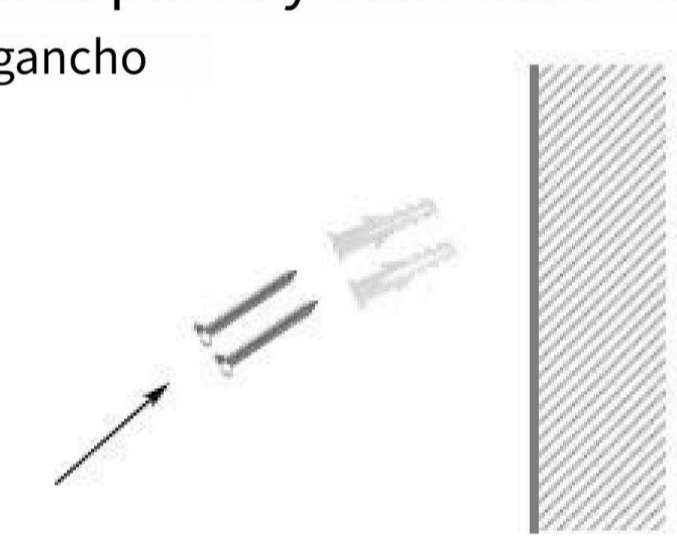

INSTRUCCIONES DE INSTALACIÓN

espejo circular

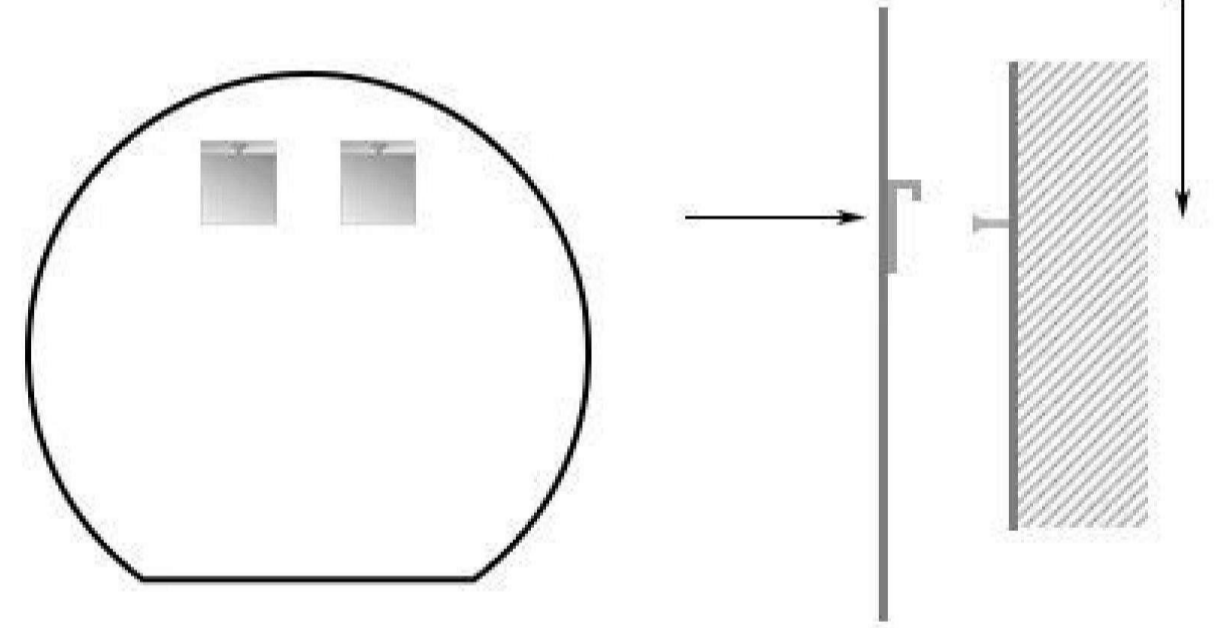

1 Prepare espejos y herramientas de instalación.

2 Perfora agujeros de 6-8 mm/0.23-0.31 pulgadas. en la pared y atorníllelo. Taco de pared y gancho

3 Cuelga la pieza para colgar el espejo en el gancho.

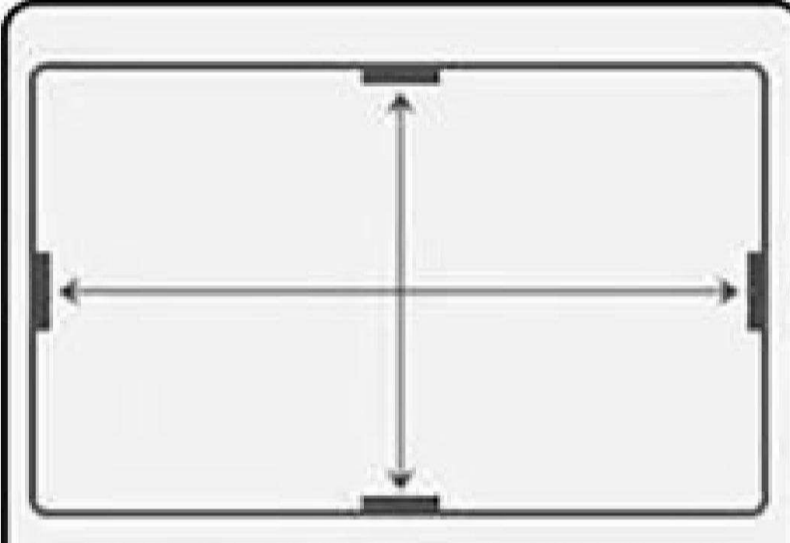

espejo rectangular

La instalación requiere las siguientes herramientas.

Cinta métrica Lápiz Taladro eléctrico Martillo Destornillador

1. Mide la distancia entre dos ganchos con una cinta métrica

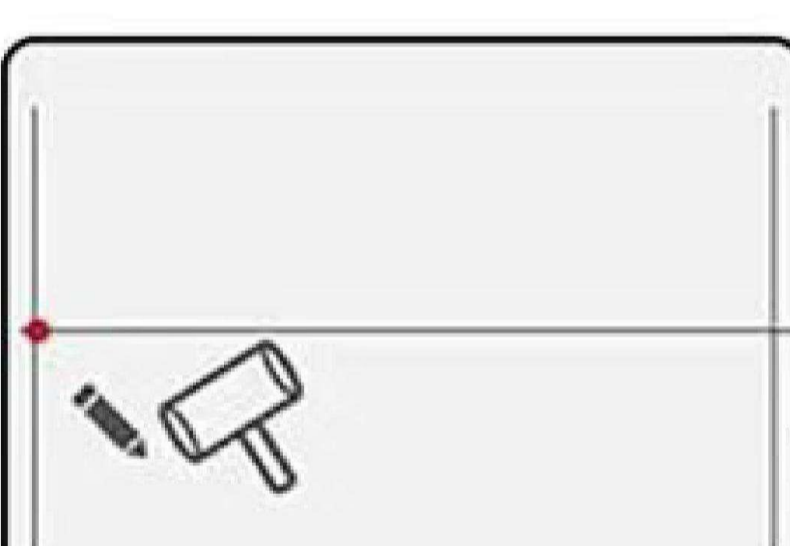

2. Dibuja una línea recta en la pared. con un lápiz, y la intersección El punto es la posición de perforación.

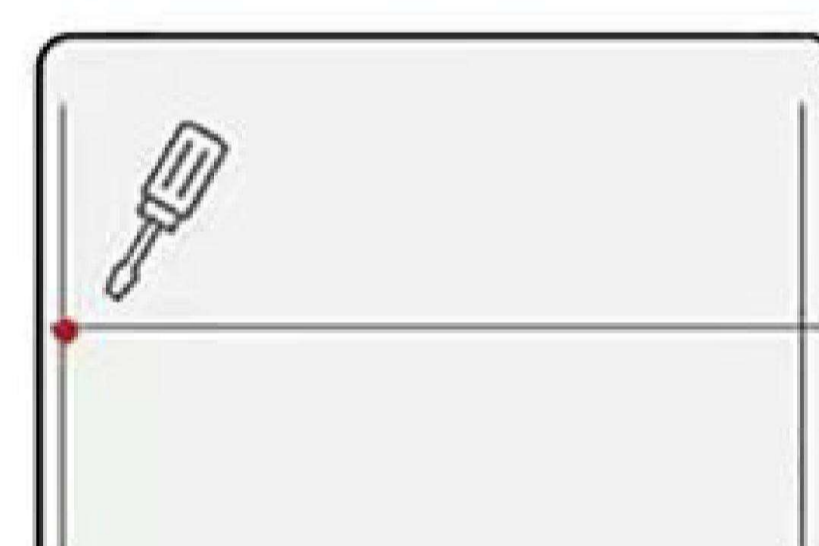

3. Perfore agujeros en las intersecciones usando un taladro eléctrico

4. Instale el enchufe de pared

5. Atornille los tornillos con un destornillador

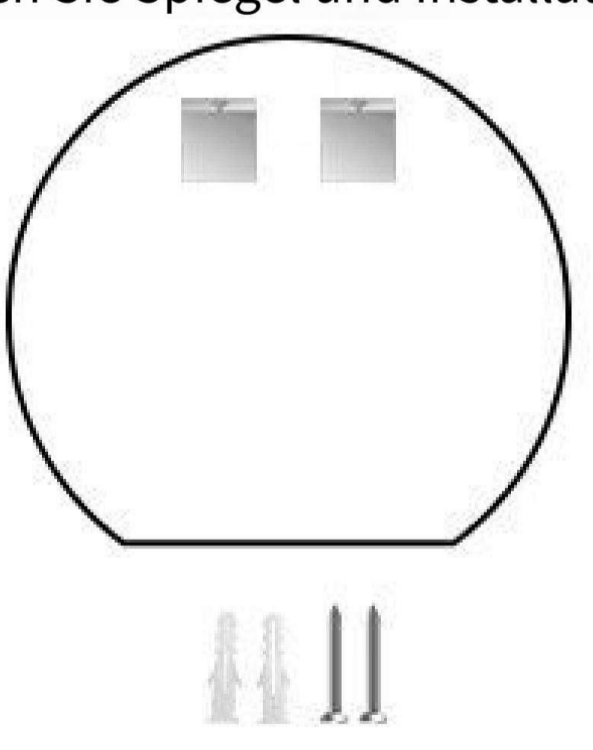

6. Monte el espejo y complete la instalación

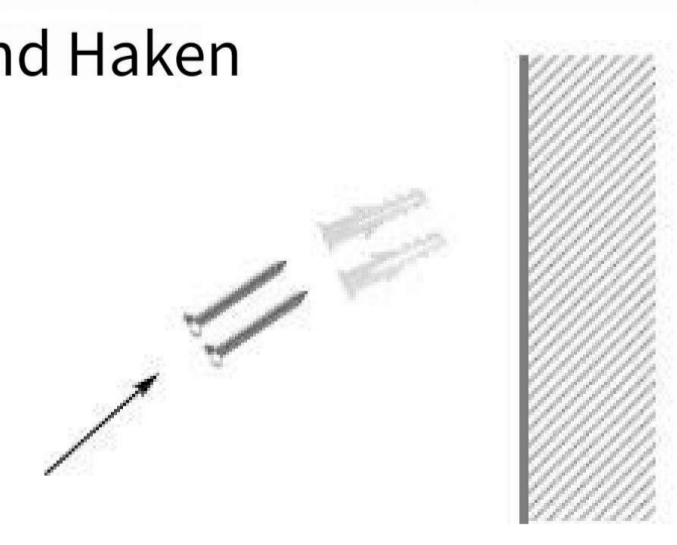

INSTALLATIONSANWEISUNG

Runder Spiegel

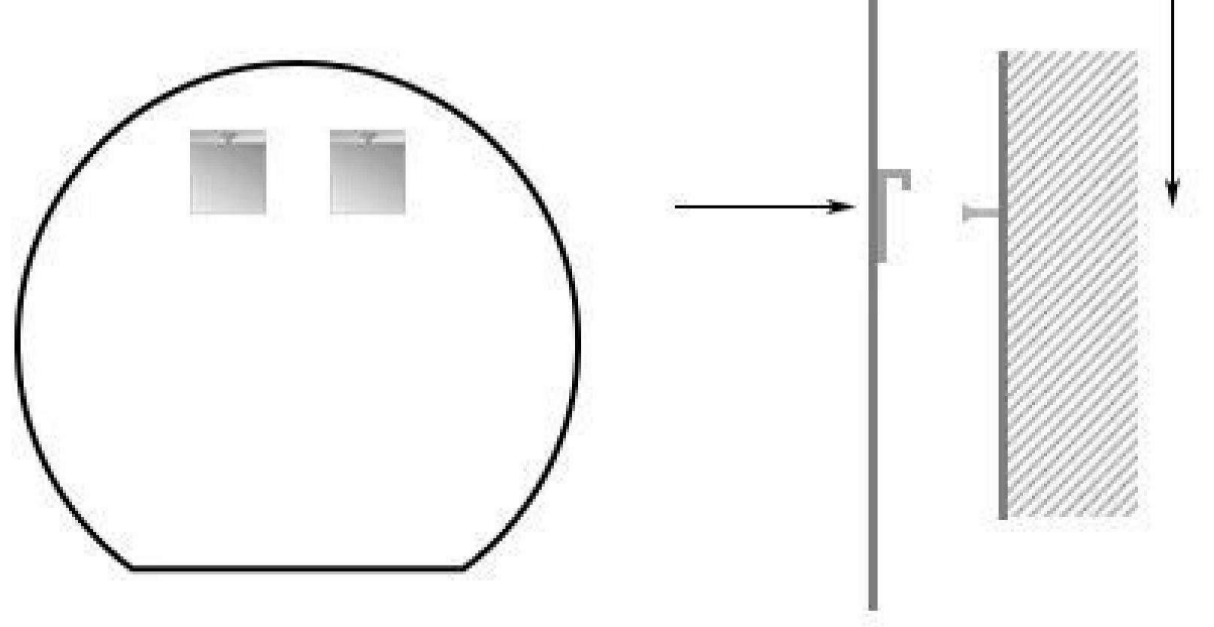

1 Bereiten Sie Spiegel und Installationswerkzeuge vor

2 Stanzen Sie 6–8 mm/0.23–0.31 Zoll große Löcher an der Wand befestigen und Dübel einschrauben und Haken

3 Hängen Sie das Spiegelaufhängungsstück an den Haken

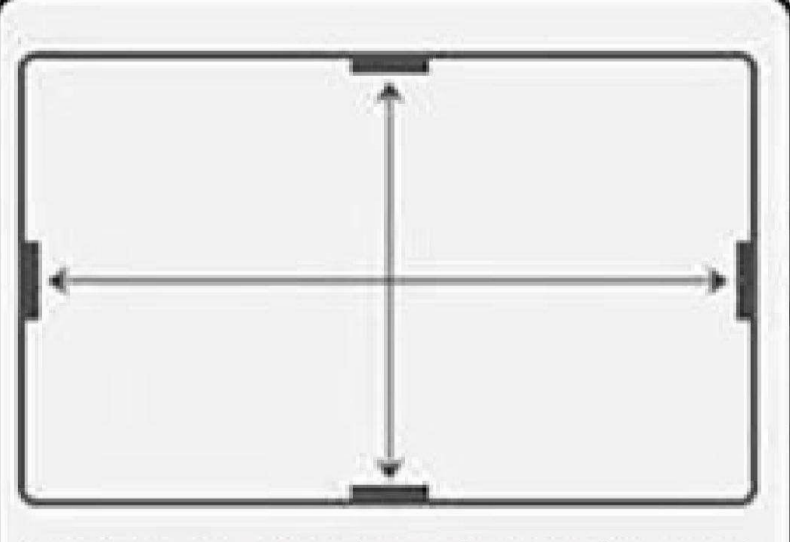

Rechteckiger Spiegel

Für die Installation sind die folgenden Tools erforderlich

Maßband Bleistift Elektrische Bohrmaschine Hammer Schraubendreher

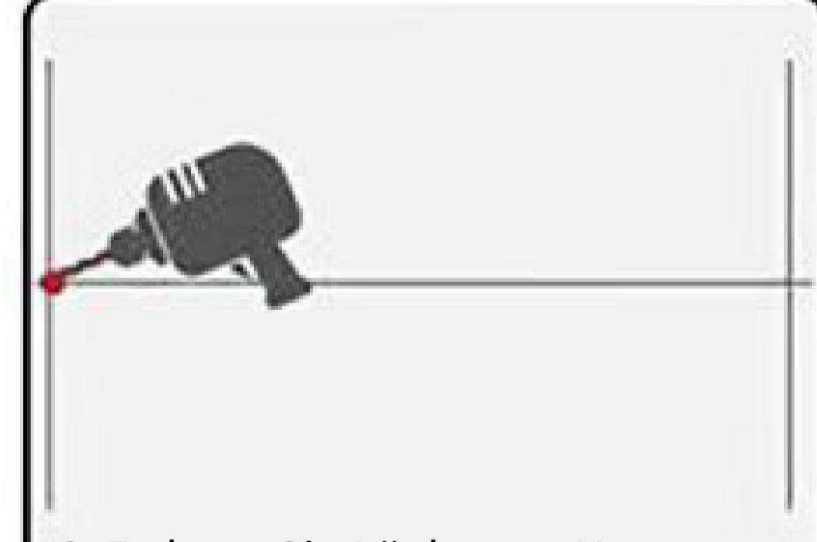

1. Messen Sie den Abstand zwischen zwei Haken mit einem Maßband

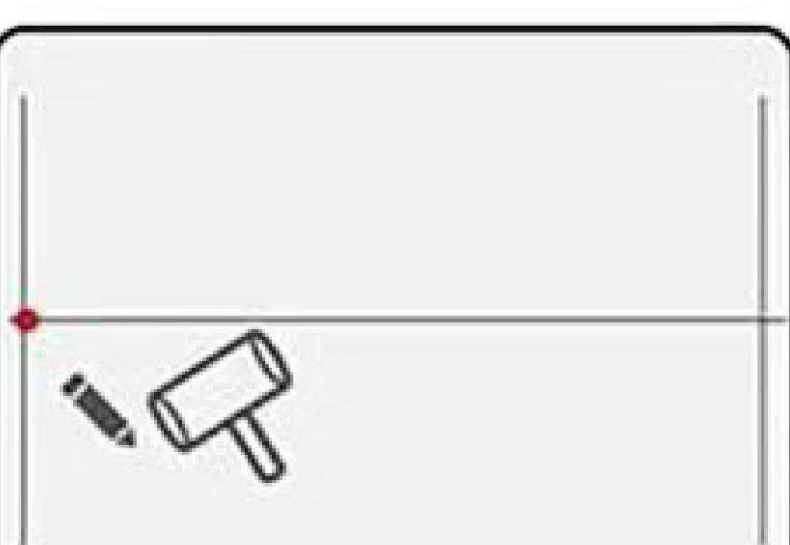

2. Zeichnen Sie eine gerade Linie an die Wand mit einem Bleistift und der Kreuzung Punkt ist die Stanzzposition

3. Bohren Sie Löcher an Kreuzungen mit einer elektrischen Bohrmaschine

4. Installieren Sie den Wandstecker

5. Schrauben Sie die Schrauben ein mit einem Schraubenzieher

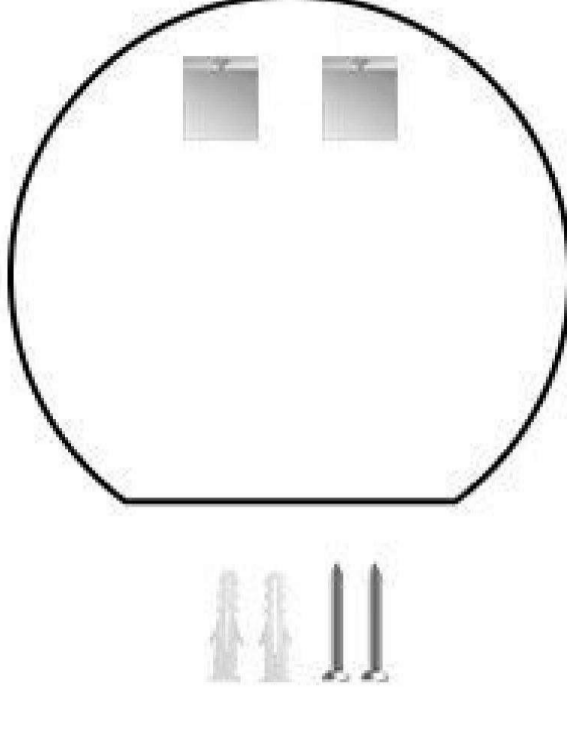

6. Montieren Sie den Spiegel und fertig die Installation

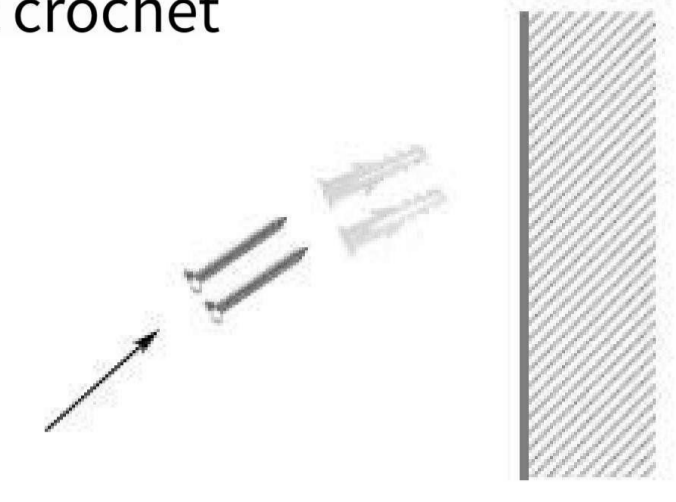

INSTRUCTIONS D'INSTALLATION

Miroir circulaire

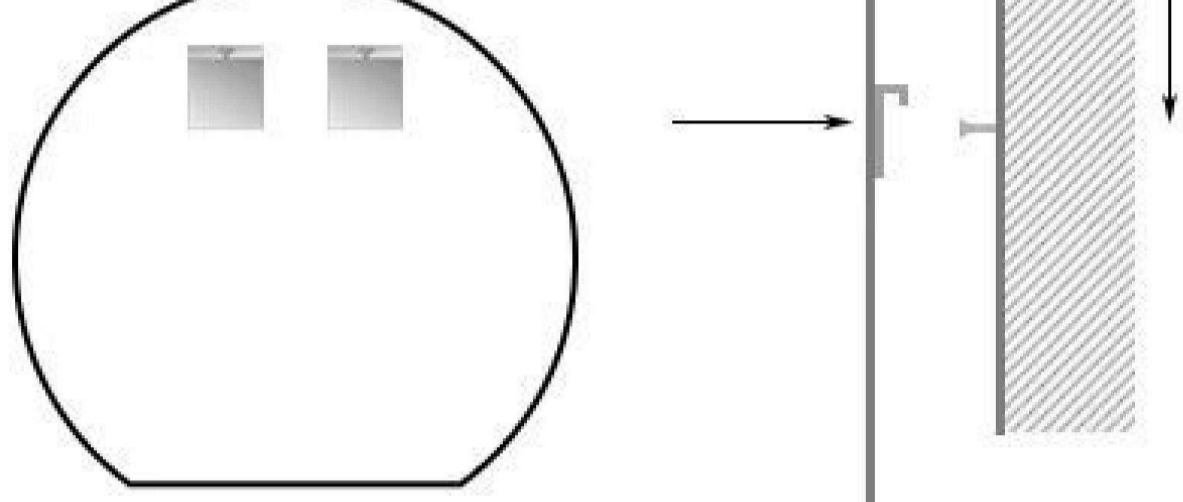

1 Préparer les miroirs et les outils d'installation

2 Percez des trous de 6-8MM/0.23-0.31 pouces sur le mur et vissez la cheville murale et crochet

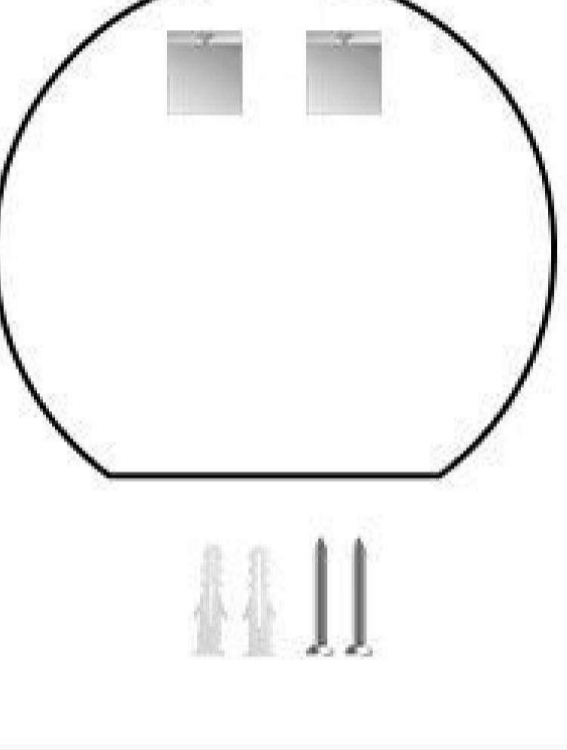

3 Accrochez la pièce de suspension du miroir au crochet

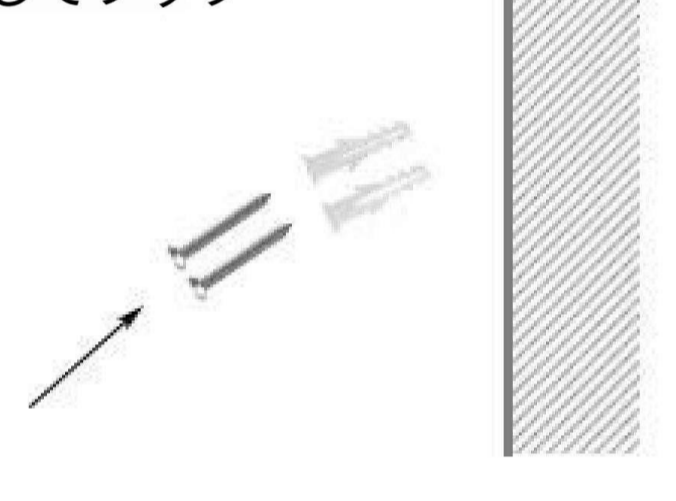

取り付け説明書

円形ミラー

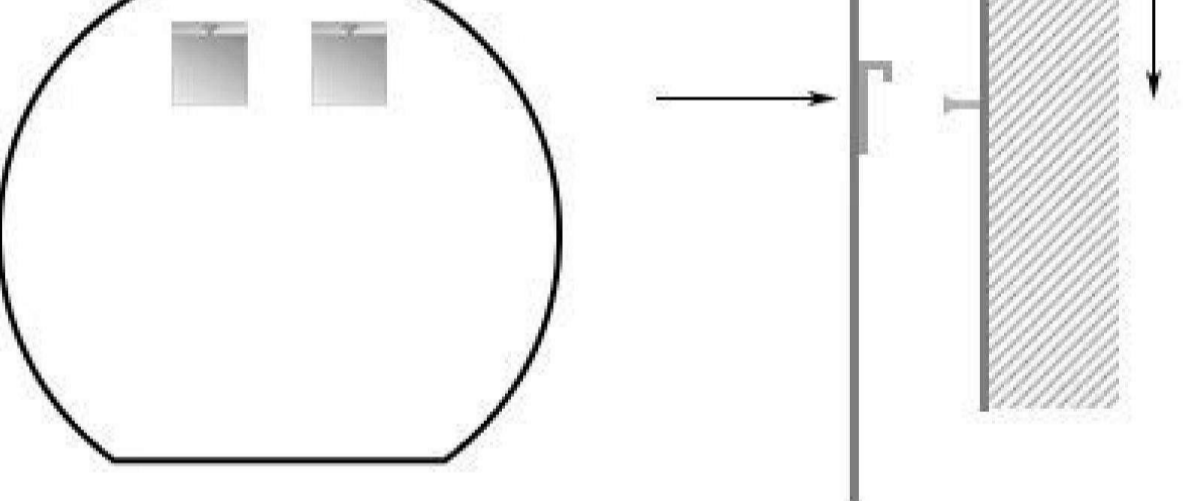

1 ミラーと取り付けツールを準備する

2 6-8MM/0.23-0.31インチの穴をパンチします。壁に取り付けて壁プラグをねじ込みますそしてフック

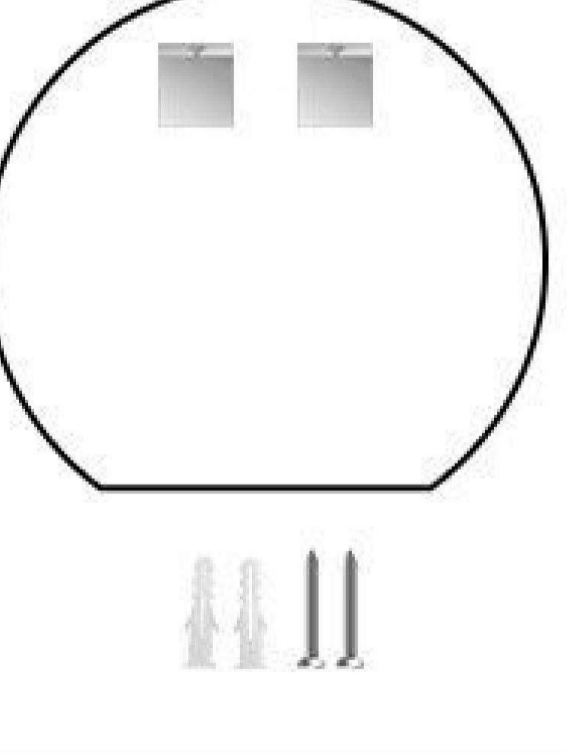

3 ミラー吊り下げ部分をフックに掛けます

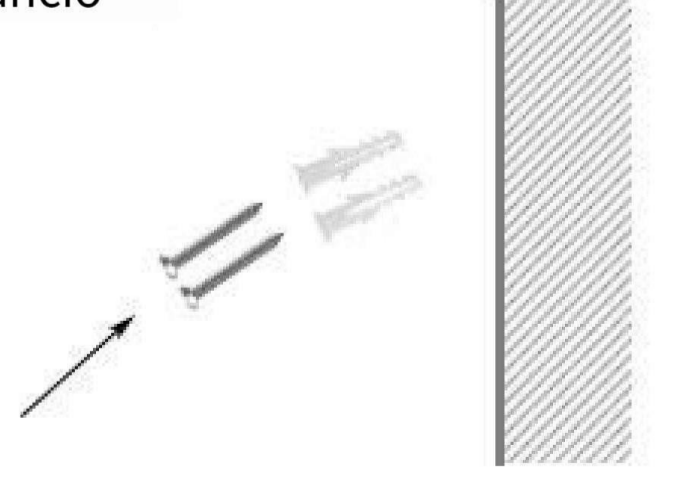

ISTRUZIONI PER L'INSTALLAZIONE

Specchio circolare

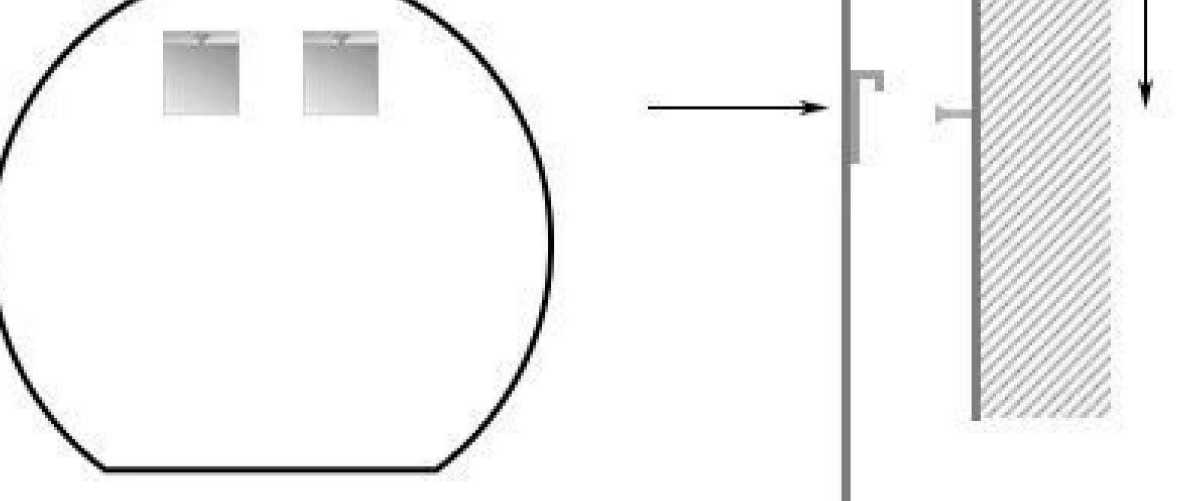

1 Preparare mirror e strumenti di installazione

2 Perforare fori da 6-8 mm/0.23-0.31 pollici sul muro e avvitare il tassello e gancio

3 Appendi il pezzo per appendere lo specchio al gancio

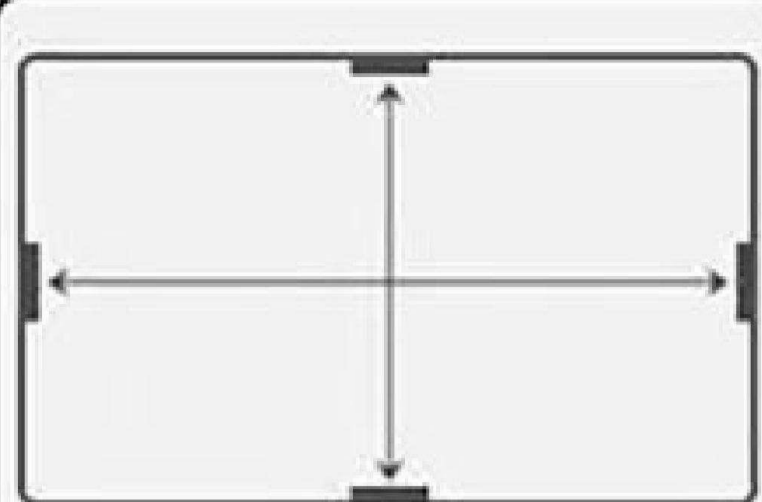

Miroir rectangulaire

L'installation nécessite les outils suivants

Mètre à ruban Crayon Perceuse électrique Marteau Tournevis

1. Mesurez la distance entre deux crochets avec un ruban à mesurer

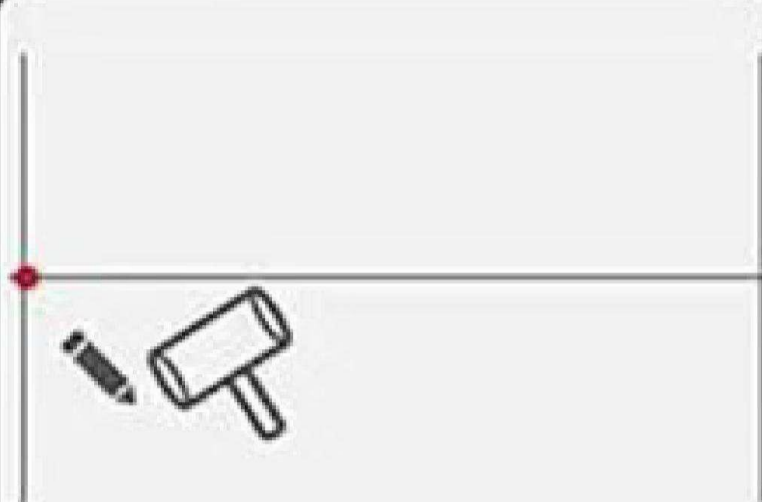

2. Tracez une ligne droite sur le mur avec un crayon et l'intersection le point est la position de poinçonnage

3. Percez des trous aux intersections à l'aide d'une perceuse électrique

4. Installez la prise murale

5. Vissez les vis avec un tournevis

6. Montez le miroir et terminez l'installation

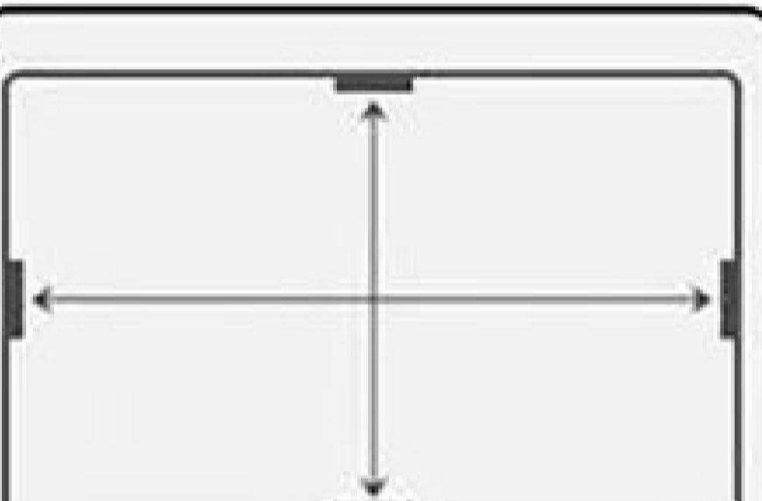

長方形ミラー

インストールには次のツールが必要です

巻尺 鉛筆 電動ドリル ハンマー ドライバー

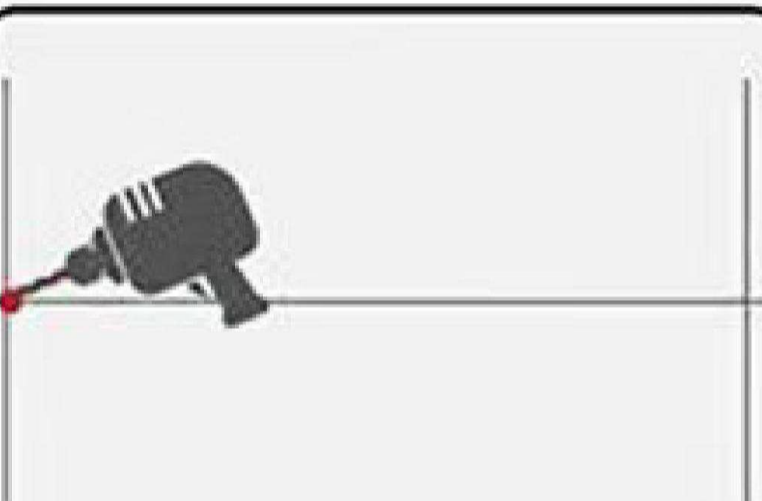

1. 間の距離を測定します 2つのフックと巻尺

2. 壁に直線を描く 鉛筆と交差点 ポイントはパンチの位置です

3. を使用して交差点に穴を開けます。電気ドリル

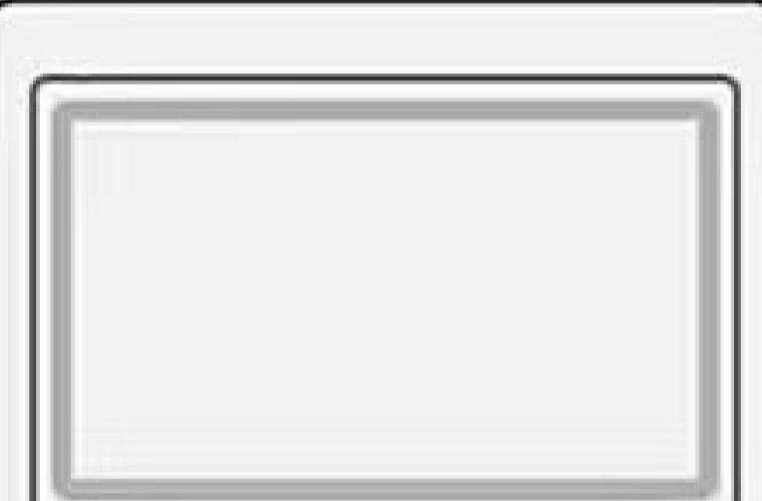

4. 壁プラグを取り付けます

5. ネジを締めます。ドライバー

6. ミラーを取り付けて完成 インストール

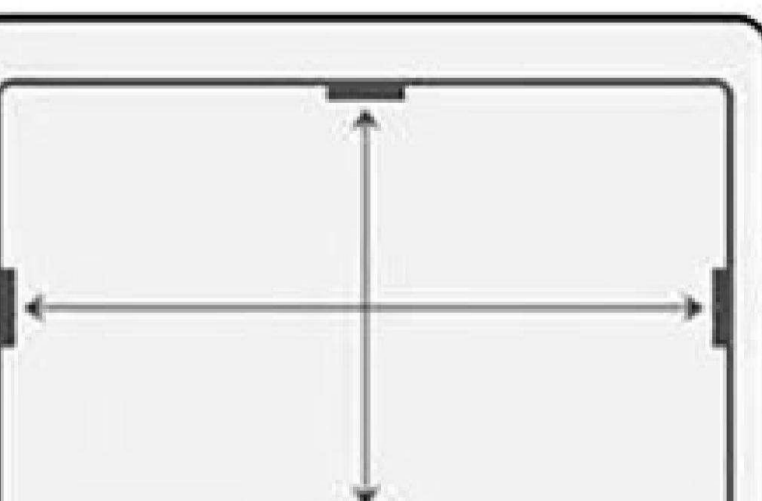

Specchio rettangolare

L'installazione richiede i seguenti strumenti

Metro A nastro Matita Trapano elettrico Martello Cacciavite

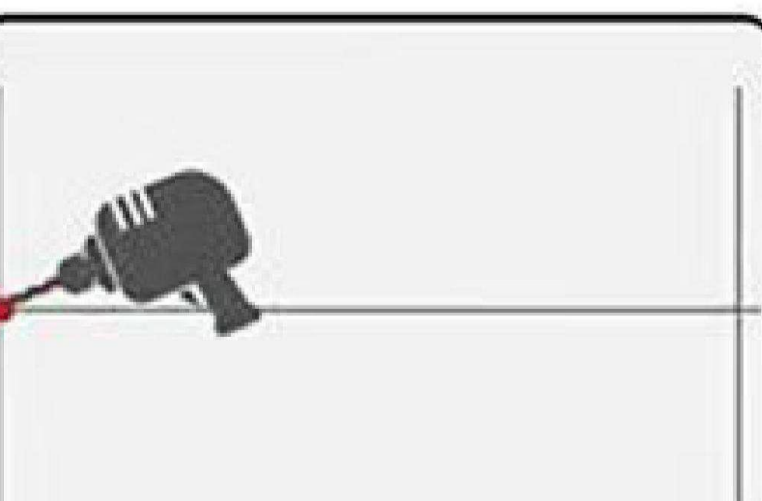

1. Misura la distanza tra due ganci con un metro a nastro

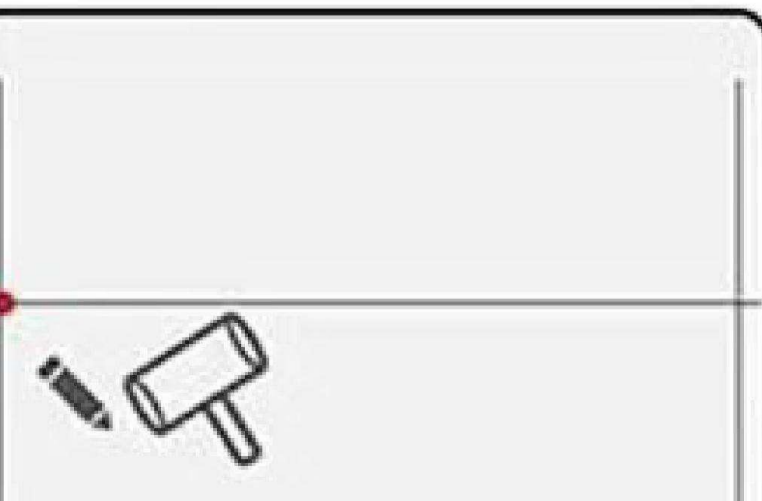

2. Traccia una linea retta sul muro con una matita e l'intersezione punto è la posizione di perforazione

3. Praticare dei fori alle intersezioni utilizzando un trapano elettrico

4. Installare la presa a muro

5. Avvitare le viti con un cacciavite

6. Montare lo specchio e completare l'installazione
