

Halo PIR Sensor Light - AG752

Package Contents:

- 3 x Halo PIR Sensor Lights
- 3 x 3M Adhesive Magnetic Mounts
- 1 x Triple USB-C Charging Cable

Power Options Switch:

- ON – Constant light mode
- OFF – Power off
- AUTO – Motion-activated mode using the PIR sensor

Specifications:

- Warm White LED, 2700K
- PIR Sensor Range: 3–5 metres
- Luminance: 10lm
- Battery: 400mAh Rechargeable Lithium
- Charging Time: 2.5 hours
- Working Time: Up to 3 months based on 4 activations per day

AUTO Mode:

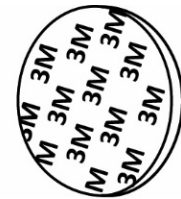

When movement from a heat source, such as a person or animal, is detected in a dark environment, the light will remain on for 25 seconds after the last detected movement.

Note: AUTO mode only works in low-light conditions to conserve battery life.

Installation:

1. Remove the backing from the 3M adhesive pad on the magnetic mount.
2. Fix the magnetic mount to a clean, flat surface.
3. Press firmly for 60 seconds to ensure a secure bond.
4. Wait 3 hours before attaching the light to the mount.

Important: Removing the magnetic mount after installation may damage wallpaper or painted surfaces, so make sure it is positioned correctly before fixing it in place.

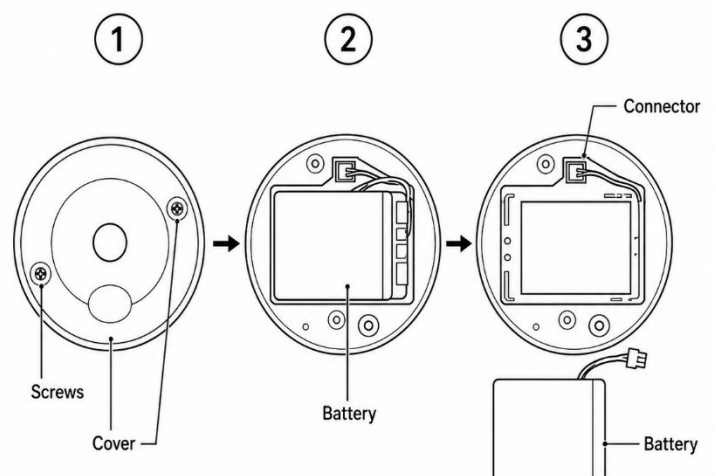

Charging:

Using the supplied USB-C cable, charge the light from a standard 5V USB power source. A charger rated at 1A or higher is suitable. The indicator light shows red while charging and turns green when fully charged.

Battery Replacement:

The rechargeable lithium battery can be replaced if required. This may be needed if, after extended use, the product no longer holds charge well or stops charging properly.

1. Remove the two screws and lift off the cover.
2. Open the unit and locate the battery.
3. Disconnect and replace the battery then reassemble.
4. Reinstall the cover and tighten the two screws securely.
