

In 2000 Furniture was established as a family-owned operation dedicated to bringing our customers quality products at a reasonable price. Since then, we have greatly expanded our inventories, manufacturing centers, and warehouses while maintaining our belief that every action we take should lead to a lasting benefit for our customers, our employees, and our company.

WOOD CARE INSTRUCTIONS

Keep furniture out of direct sunlight to avoid sun and light damage and color bleaching.

Keep furniture away from direct heating and cooling sources as they affect the moisture content of the wood.

Do not place hot items directly on the wood surface. Use trivets or mats under hot dishes and placemats under china, ceramics, silver or other objects that can scratch the surface.

Use coasters under all glass, particularly those containing alcohol or citrus juices. Many common foods and drinks contain acids that will etch or dull the wood surface.

Clean wood with a soft, dry cloth to remove dust. Use a wood cleaner or protection agent to remove dirt and grime and restore the sheen to the wood finish, being careful not to transfer the cleaning agent to your upholstered fabrics.

At Furniture, we use Velvet and Chenille fabrics that are specially manufactured to achieve a slightly distressed or “vintage” appearance. This antiqued or vintage look of the fabrics is achieved by stone washing and finishing the fabric. The fabric will include intentional markings made by the washing and finishing process. Velvet construction fabrics, Chenille yarns, Suede Fabrics, and Faux Furs are common upholstery fabrics that have a nap, using high pile yarns.

To “bloom” or “plump” pile yarns to their original state from the compression of packaging materials during shipment, please follow the directions below:

1. Using an upholstery brush with soft, flexible bristles, brush the fabric against the grain, to lift the pile yarns up and away from the fabric base; depending on the fabric and yarn type, a second brushing may be required.
2. If you own a small hand-held, or commercial steamer, next gently steam the affected areas of the fabric, using small bursts of steam that will “bloom” or plump the pile and yarns. Never touch the steamer directly to the fabric.
3. If your steamer has a brush attachment, follow the step above by brushing against the grain of the fabric with the bristle side of the brush attachment to lift the pile and yarns.

NOTE: When brushing your hand with or down the grain of a nap or pile fabric, the fabric will feel smooth; when brushing your hand against the grain of a pile fabric, the fabric will feel rough.

Your fabric has a cleaning code that will guide you on proper care. If you cannot locate the cleaning code on the labeling, please refer to our website or email us at sales@newclassicfurniture.com

Code "W"

Code "W" is used on fabrics that should be cleaned with water based cleaning agents. Spot clean using foam from only water based cleaners, or non-solvent cleaning products. Apply foam with a soft brush in a circular motion, and vacuum when dry.

Code "S"

On fabrics with an "S" code, use a mild water free cleaning solvent or dry cleaning product. Make sure the room is well ventilated when using.

Code "W-S"

Code "W-S" fabric can be cleaned with either water or solvent based products. Use a mild solvent, an upholstery shampoo, or the foam from a mild detergent.

Code "X"

Clean this fabric by vacuuming or gently brushing only. NEVER use any cleaning agents at all. Any cleaning product whether water or solvent based may cause staining, shrinkage or distortion of the fabric surface pile.

General Guidelines

- Regularly clean your fabric by vacuuming or light brushing.**
- Test cleaning product in an inconspicuous area first to guard against color bleeding or fabric shrinkage.**
- Call a professional when your upholstery needs overall cleaning.**

MARBLE TOPS CARE INSTRUCTIONS

Use coasters under all glass, particularly those containing alcohol or citrus juices. Many common foods and drinks contain acids that will etch or dull the stone surface.

Blot up spills immediately.

Do not place hot items directly on the stone surface. Use trivets or mats under hot dishes and placemats under china, ceramics, silver or other objects that can scratch the surface.

Cleaning Procedures and Recommendations:

Clean stone surfaces with a few drops of neutral cleaner, stone soap (available at hardware stores).

Use a clean, soft cloth for best results.

Do not use products that contain lemon, vinegar, or other acids, on marble.

Rinse the surface thoroughly after washing with the soap solution and dry with a soft cloth.

A good quality marble wax or non-yellowing automobile paste wax can be applied to minimize water spotting.

Leather Care Instructions

uses only full top grain pigmented leather. Your fine leather furniture may contain variances of shading, color, and texture giving leathers their unique personalities, and are not considered as imperfections.

Pigmented (Protected) Leathers Cleaning Code is W. Scars and branding marks are natural markings and are not considered flaws.

Do not place your furniture directly next to a heating source. Do not place your furniture directly next to a window, under a skylight, or in a sunroom. All leathers are subject to fading over time.

The application of a leather protection cream will improve the leather's resistance to staining and soiling, especially on seats, arms and backs.

Wipe your leather with a soft, dry cloth to remove dust. Fully clean your furniture with a soft cleaner and re-protect with a protection cream every six months to remove dirt and grime as well as gradual accumulation of body oils. For oil-based stains, use a leather de-greaser.

Do not use any other products not recommended for leather as they may damage the leather's surface.
