2 Snap the guide rails into the slider clips (8 slider clips are already installed in track)
*Make sure the Velcro side on head-rail is facing you, and follow the correct number sequence.

Slider Clips come pre-installed to track.

3 Adjust the panel track to the width needed. Be careful not to over extend the track and cause it to separate completely.

Adjustable
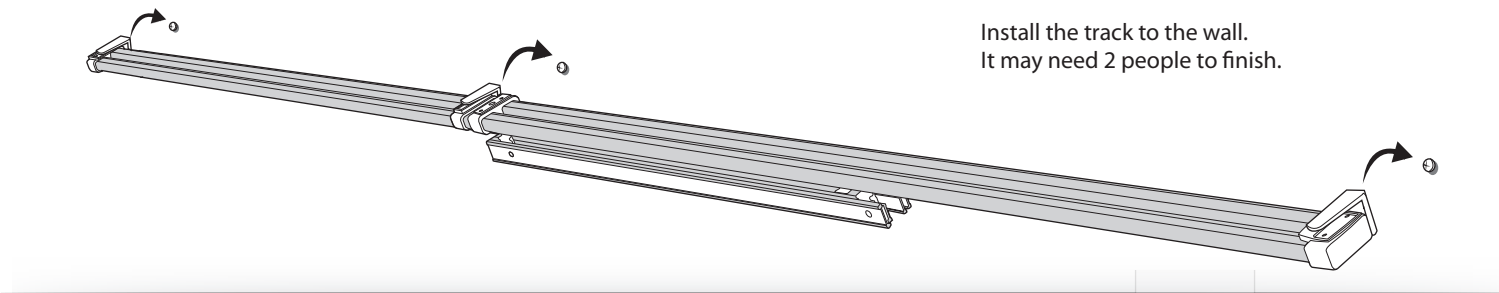

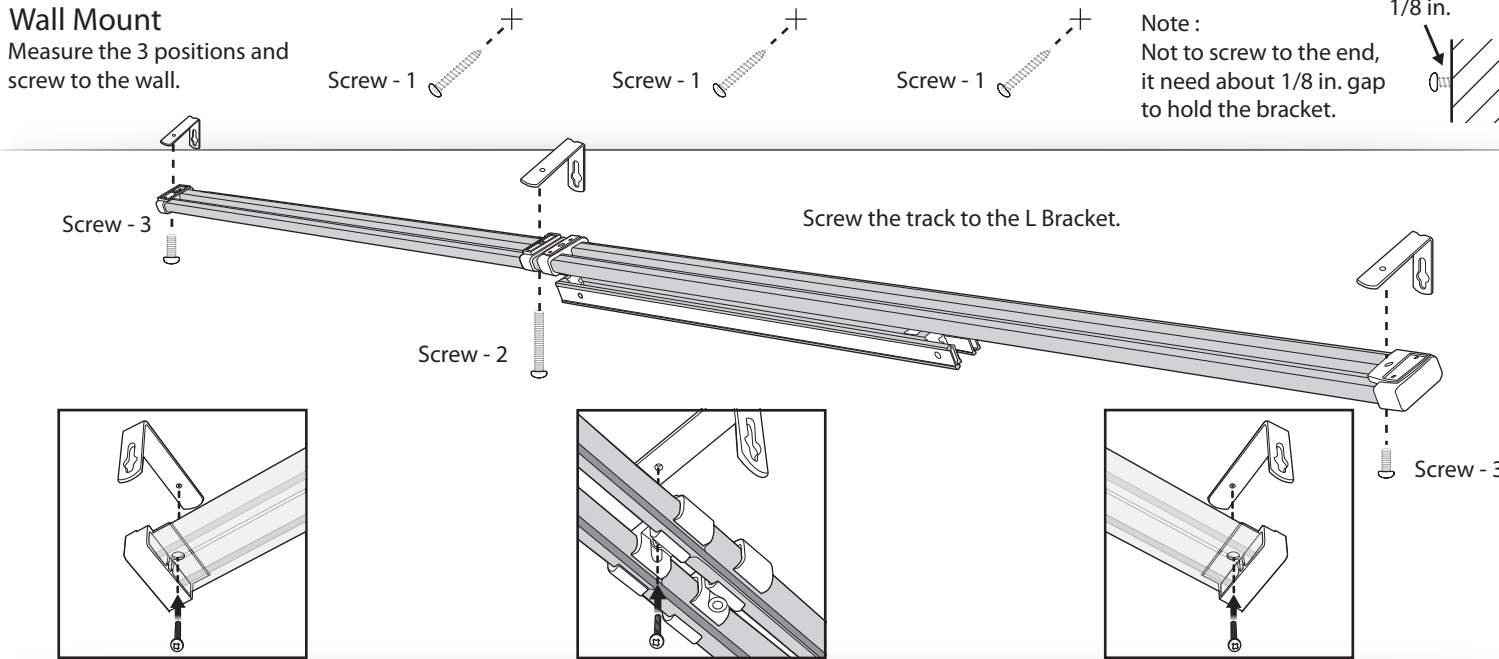

**4** Mount the brackets and screw the track onto the ceiling.

Ceiling Mount

Screw - 1

Screw - 1

Screw - 1

Screw - 1

Wall Mount

Measure the 3 positions and screw to the wall.

Screw - 1

Screw - 1

Screw - 1

Note :
Not to screw to the end, it need about 1/8 in. gap to hold the bracket.

1/8 in.

Screw the track to the L Bracket.

Screw - 3

Screw - 2

Screw - 3

Install the track to the wall.
It may need 2 people to finish.

5 Measure the length needed for the panels. If needed, you may adjust the length of your panels to fit your desired length. Cut the panel /panels according to your measurements.
Then take your metal strip and place at fresh cut for that clean look.

Cut the panel according to your measurements.

Measure the length you need.

Panel

Inner Alu Bar

Bottom Rail

6 Attach the panel pieces to the guide rails.
