Assembly Flow Chart

Step 1

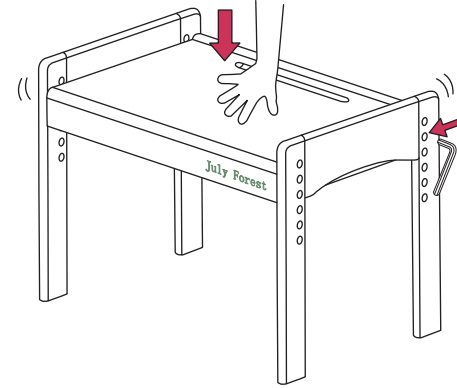

Take out the table top, and use hexagonal hexagonal screws (1/4"X25mm) to install the table legs according to the required height, **without locking, and the large hole side is facing outward**

Note: The large hole (counterbore) must be facing outward, and the hexagon screw is locked from the outside, and it will be flat with the board after locking

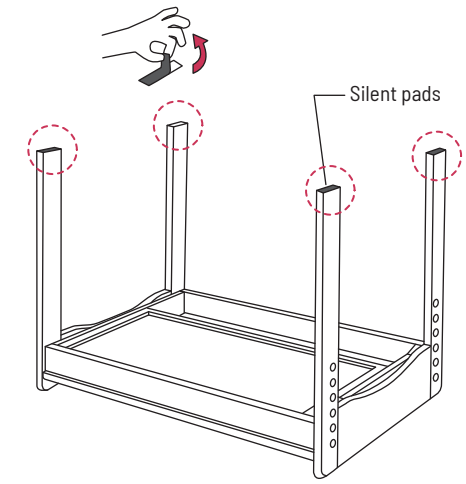

Step 2

Install another leg, **non-locking**, with the large hole facing outward, using hex screws (1/4"X25mm)

Step 3

After pressing the tabletop, adjust the balance, then lock the legs and lock the legs diagonally

Step 4

Silent pads can be pasted upon request

Adjust the height of the hole
(add 2.5 cm to the height of the table)
