Installation Instructions

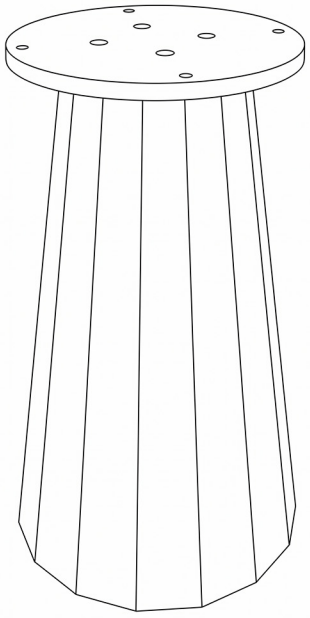

Important Preparation Notes

1. Read this entire instruction manual thoroughly before you begin assembly.
2. This product is delivered in 2 separate packages. Please confirm you have received all packages upon delivery.
3. Inspect the outer cartons for signs of damage. If no external damage is found, open the packages and check that all parts are present and free of defects (refer to the parts list).

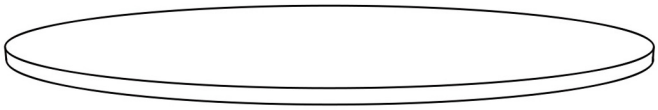

Safety & Assembly Precautions

1. Assembly is strongly recommended for two people.
2. When fitting multiple screws: loosely insert all screws first, then tighten them gradually and evenly. Do not fully tighten any single screw before all others are in place.
3. Avoid over-tightening screws, as this may strip threads or damage wooden components.

Installation components

4

Step 1: Mount the Tabletop

1. With two people, carefully lift the tabletop.
2. Lower the tabletop gently onto the pre-assembled base.
3. If required, rotate the tabletop slightly to match the pre-drilled holes on its underside to the holes on the base.
4. Loosely insert all tabletop mounting screws.
5. After all holes are fully aligned, tighten all screws gradually and evenly.

Step 2: Final Inspection

1. Double check that every screw has been tightened securely.
2. Gently rock the table to verify it stands stable, with no wobble or abnormal rattling.

Your assembly is now complete!

5

Leveling Foot Adjustment Guide

This adjustable leveling foot mounts on the bottom of the base to stabilize the table on uneven ground.
1. Screw the feet into the threaded holes at the column base.
2. Rotate the plastic foot to adjust height and stop table wobble.
Note: Installation is optional. The table works fine without these feet.
