1. Install the bird perch at the bottom of the container

2. Turn the container upside down and tighten the thumb screw.

3. Install the accessories for storing food on the perch.

4. Install the antenna on the back connector of the container.

5. Attach the cover to the top container and connect the charging cable from the cover to the charging port on the back of the container.

Installation Steps

On The Tree

1. Thread the strap through the fixed bracket.

2. Tie the strap that goes through the bracket around the tree trunk or cylinder.

3. Place the bird feeder on the fixed bracket and secure it with screws.

4. Installation completed.

On The Wall

1. Place positioning stickers on the wall and punch holes with a perforator.

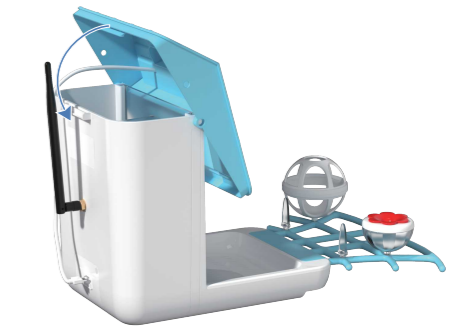

2. Thread the screws through the holes punched according to the positioning stickers and lock them in place.

3. Place the bird feeder on the fixed bracket and secure it with screws.

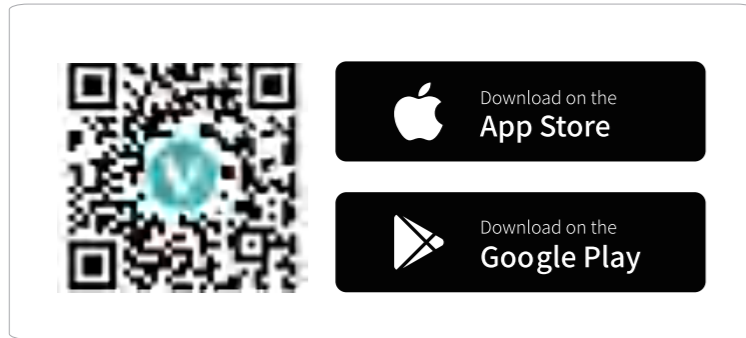

4. Installation completed.

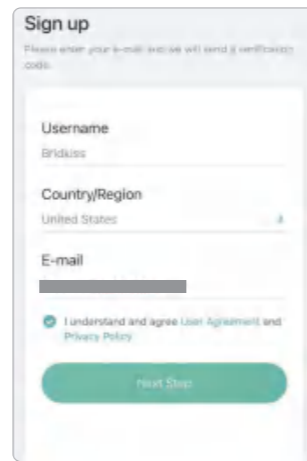

Charging Method:
You can choose to charge the camera directly with the charging cable or through the charging port on the back of the container.
