JRYTIN 47.2” x 23” Wooden Soaking Tub

User Manual
Model: STB06601

- **Quick Start Guide**
  No complicated installation needed.
  1. Place the tub on a flat, stable, level surface.
  2. The drain hose is pre-installed. Gently pull out the extendable drain hose from the bottom and securely insert it into your floor drain, or connect to an existing drain line if applicable.
  3. This tub includes a chrome pop-up drain. Press to open/close the drain.
  4. Fill with clean, warm water to your preferred depth and enjoy.
- **Installation**
  Tools Required: None
  1. Position the tub in your desired location and confirm it is stable (no rocking or wobbling).
  2. Ensure the drain hose is fully inserted into the floor drain and the connection is secure.
  3. Test the pop-up drain (press to open/close) before filling.
- **Natural Wood Hydration (First-Time Use)**
  Crafted from 100% natural solid wood, your bathtub will gently respond to its surroundings over time. In drier climates—or after long-distance transit when the wood may release some moisture—you may notice slight, temporary contraction. During the first fill, a small amount of moisture seepage from knots, seams, or joints may occur. Please rest assured: this is a normal characteristic of authentic solid wood and not a product defect.
- **Traditional Self-Sealing (Rehydration) Process**
  To restore the wood’s natural moisture balance and help the tub re-seal, follow the traditional hydration method below:
  1. Fill the tub completely with clean water.
  2. Let it soak for 48–72 hours (or longer if needed).
  As the wood rehydrates, it will gently expand and naturally re-seal—much like traditional Japanese Ofuro tubs.
  Tip: If the tub is unused for over one month, we recommend repeating this hydration process before your next bath.
  If seepage continues after 72 hours: please contact us through your order details page on the platform where you purchased the tub.
- **Daily Care & Maintenance**
  Drain all water completely after each use.
  Wipe the interior with a clean, soft towel.
  Use mild soap and water only when needed.
  Do not use harsh chemicals, bleach, solvents, or abrasive cleaners.
  Keep the bathroom well-ventilated to preserve the natural wood finish.
  After draining, leave the drain open briefly to allow any residual water to fully empty.
- **Safety Warnings**
  For indoor use only.
  Keep away from direct sunlight and heat sources (e.g., fireplaces, heaters) to protect the wood’s structural integrity.
  Avoid standing inside the tub to prevent slipping.
  Never leave children unattended in the tub.
  Two-person lift recommended.
- **Warranty Information**
  1-Year Limited Warranty: Covers functional manufacturing defects.
  Exclusions: normal wear and tear; natural wood grain variations; minor superficial checking that does not affect functionality; and damage caused by misuse, poor maintenance, or unauthorized modifications/repairs.

Disclaimer： This guide provides general information based on our research and objective testing. Actual results may vary depending on installation and usage conditions. Warranty coverage is limited to the terms stated in this document.

Need Assistance: If you have any questions or need support during installation or use, please contact us directly through your order details page on the platform where you made your purchase. We are always here to help.
