

BULKCARD, 8X5 INCH

BAMBOO EXPANDABLE CUTTING BOARD

Clean and thoroughly dry the cutting board corners, peel off the protect paper and paste the rubber pads on 4 corners.

- Our bamboo expandable cutting board is made of durable natural bamboo. The surface is carefully polished and “unfinished” and provides natural color and food safety.
- The cutting board is equipped with 4 anti-slip rubber grip feet to prevent the board from shifting during use so you can be confident the chopping board will stay firmly in place.
- The cutting board maximizes kitchen workspace by turning the area above the sink into an extension of the worktop, by expanding over the sink. Your workspace will be clean and well-organized even during the busiest cooking moments.
- To clean, hand wash with a damp cloth & towel dry. Do not let your bamboo item sit in water or remain wet for any length of time. To extend the life it is recommended that this cutting board be maintained routinely with natural mineral oil.
