Tools required: Long Phillips/Flat Head screwdriver (not Included),  
Short Phillips screwdriver (Included).

# How to use the cam lock system

**1. Screw cam bolt into panel**

**2. Push cam into panel - arrow feature on cam top points to panel edge**

**3. Align cam bolt(s) with cam(s) and insert all the way into cross-bored hole(s)**

**4. Rotate cam(s) clockwise 190°-230° to lock panels together**

**5. Panels should be tight against each other and connection should be rigid**

**Insert the wood dowel (A) at least half way by tapping lightly with a rubber mallet, IF NECESSARY**

## **! WARNING**

- Unit must be placed on a level surface or leveled with included hardware (when applicable).
- Do not sit or stand on or allow children to climb, sit or stand on the assembled product.
- For safety reasons, it is imperative that this unit be mounted to the wall.
- Do not use without installing the tip restraint.
- Unit can tip over causing severe injury or death.
- Do not exceed the recommended weight limits.
- Evenly distribute the weight on each level and always keep the heavier loads on the bottom.
- Before cutting, drilling or hammering into any wall or floor surface, verify the location of electrical, plumbing and gas lines. Cutting may cause serious injury.

**Now you can assemble the item.**

**The installation process is divided into two parts:**

1. Install the cabinet body
2. Install the base parts

**Tip:**

Using an electric screwdriver will make assembly easier.

STEP 1

|                                                                                                        |                                                                                                          |                                                                                                         |                                                                                                         |                                                                                                         |
