Geometric Progression 8

D1214S24267-2266

Geometric Motion VIII is part of a series of eight geometric drawings that invite the viewer to experience the elegance of minimalist design. These understated compositions showcase line drawing techniques that explore a variety of geometric shapes that highlight the fundamental importance of the line in art. In

Geometric Motion 8, a sense of playfulness can be found in the various geometric lines that comprise the drawing. The subtle gradation of line weight serves to highlight the work's unique proportions. The series is reminiscent of Josef Alber's geometric line drawings of the 1950s. Part of ART by TA, Geometric Motion 8 is an exclusive and original work of art.
