WARNING

Covering the roof carefully, puts all places in the right position.

As much as possible as not make the frame structure of the greenhouse out of the shape.

Do not use it in bad weather conditions, such as a rainstorm, stone, heavy snow, and heavy wind.

Note:

- 1. This product needs two people to cooperate with the assembly.**
- 2. Due to the large number of screws, it is recommended to use power tools.**
- 3. Do not lock the screws directly during the installation process, and lock all the screws after all the shelves are set up.**
- 4. Take out all the accessories and place them according to the list above for installation.**
- 5. Fit the tarpaulin only after fully unzipping the zippers first.**

Caution: Ensure the zipper is unzipped before installing the tarpaulin.

Assembly Instruction

Take out all the accessories and place them according to the list above for installation.

Install the brackets on left sides.

1. Please place the parts according to the above picture;
2. Lock the pole with screws(13*3pcs)(12*1pcs)(10*1pcs);
3. Do not lock it first, so as to facilitate the installation later;

Install the brackets on right sides.

1. Please place the parts according to the above picture;
2. Lock the pole with screws(13*3pcs)(12*1pcs)(10*1pcs);
3. Do not lock it first, so as to facilitate the installation later;

Install the bracket at the top.

1. Please place the parts according to the above picture ;
2. Lock the pole with screws(13*2pcs;12*6pcs;11*8pcs;);
3. Do not lock it first, so as to facilitate the installation later;

Assemble the assembled left and right brackets and the top brackets.

1. Please place the parts according to the above picture ;
2. Lock the pole with screws(12*4pcs;10*2pcs;);
3. Do not lock it first, so as to facilitate the installation later;

Tighten all bolts and nuts in full.

Use plastic stoppers(16*10pcs)
to plug the nozzles on both sides.

For maximum stability of your polytunnel, we recommend digging a 20cm width trench around the base of the polytunnel and back.

Caution: Ensure the zipper is unzipped before installing the tarpaulin.

Place the assembled bracket in its entirety into the pre-dug pit foundation.

Cover the edges of the tarpaulin(19) with dirt and compact, to reinforce the stability of it. Drill the spiral nail(15*4pcs) into the soil first, and then use a rope(14*4pcs) to tighten and tie tunnel greenhouse and the spiral nail tightly.
