FAUCET HOLE PLACEMENT

Recommended deck hole 1-3/8" .Drill holes for bridge faucet in mounting surface 8" on center. We recommend installing the side spray hole a minimum of 4-3/4" away from nearest mounting hole of faucet.

1.

Connect the Quick Connector(C) to the Faucet (A) and sealed it with a Small Washer (B), then put the faucet and the Sprayer Base(D) into the mounting hole, after that, ready for the next step.

2.

Tighten the faucet and the sprayer base by using small Nut (F) and a large Nut (H), Rubber Washer (G) are required between the Nuts and the fixing plate.

3.

Connect the faucet with hot and cold water supply valve by using hose(I&J), connect the Sprayer (K) to the Spray Hose (L) then put it into the Sprayer Base and ready for the next step.

4.

Connect the Spray Hose to quick connector (C). Then install the Weight (L) to the proper place on the Spray Hose. Product install is complete
