## TOOL LIST

NOTE: Designated with (★) We provide additional spare parts in the hardware package

①\*12

★ M8\*20mm  
Bolts

②\*1

M8  
Allen key

Please make sure all hardware&packing material fitting the list. Especially some small accessories may be missing during transportation. Please contact us if you have any question.

# step 1

Unzip the zipper on the bottom of the seat frame (B) and take out both ears (C & D) of the backrest.

# step 2

To assemble the Backrest and the Seat frame, place the backrest between the two armrests. Align the metal connectors at the lower sides of the backrest with the corresponding metal connectors on the inner sides of the armrests, then press firmly on the top of the backrest to ensure the metal connectors are fully inserted. If there is a visible gap between the backrest and the Seat frame, apply pressure on the top of the backrest or place a book or wooden block on either side of the top and tap gently with a hammer to fully secure the connectors.

If the distance between the armrests is too tight or too loose, making insertion difficult, gently push the armrests apart or pull them closer together to adjust. This is a common variation in handcrafted products and not a quality issue.

During installation, handle with care to prevent the metal connectors from damaging the fabric.

# step 3

To install the wings on both sides of the backrest, align the metal connectors on the inner side of each wing with the corresponding connectors on the upper sides of the backrest. Press horizontally toward the backrest while simultaneously pressing down on the top of the wing to ensure the connectors fully insert into place.

# step 4

To install the wings on both sides of the backrest, align the metal connectors on the inner side of each wing with the corresponding connectors on the upper sides of the backrest. Press horizontally toward the backrest while simultaneously pressing down on the top of the wing to ensure the connectors fully insert into place.

# step 5

Install all the legs (F) to the bottom of the seat frame (B) as shown. Use the allen wrench (2) provided to tighten the bolts (1). Make sure all the bolts are fully tightened before next step.

# step 6

Place the seat cushion (E) onto the seat frame (B) as shown.

# step 7

Please note: the legs of the chair can be adjustable by twisting the leveler on the tip of the legs as shown, it can help you to use this chair on ground that is not flat, please check before you use the chair.
