

WALL MOUNTED BATHROOM SINK

INSTALLATION INSTRUCTIONS

IMPORTANT

- Please read all instructions carefully before installation.
- This product must be installed on a solid, load-bearing wall.
- Professional installation is recommended.
- Two people are recommended for installation.

TOOLS YOU MAY NEED

Drill

Pencil

Level

Screwdriver

Wrench

Tape Measure

PARTS CHECK

Sink

Support Bracket (x2)

Expansion Bolt (x 4)

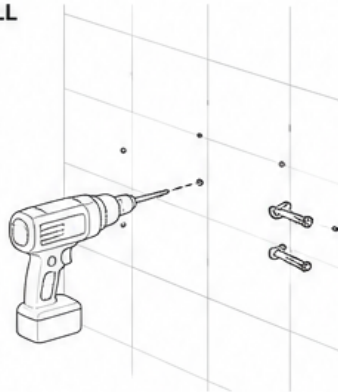

Screws (Short) (x4)

1 DRILL HOLES IN THE WALL

Use a level to mark the installation height. Mark the hole positions on the wall, then drill holes with an appropriate drill bit.

Insert the Expansion Bolts into the holes.

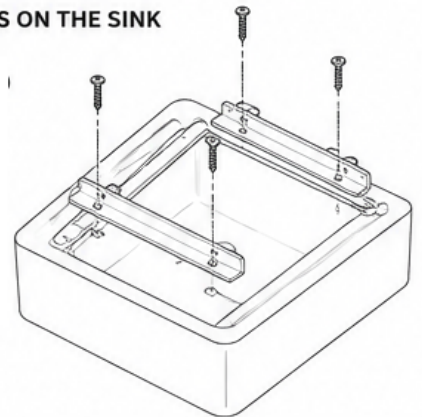

2 INSTALL BRACKETS ON THE SINK

Place the Support Brackets on the back of the sink.

Align the holes and secure each bracket with the Screws (Short).

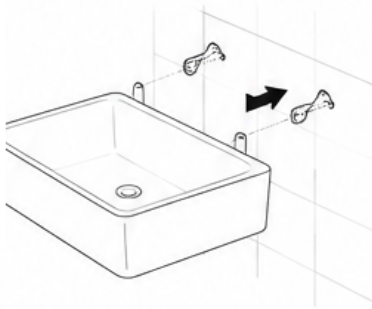

Tighten the screws firmly.

3 ALIGN THE SINK WITH THE WALL HOLES

Carefully lift the sink and align the installed brackets with the wall expansion bolts / holes.

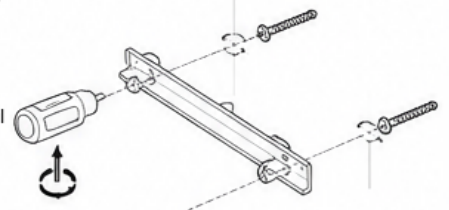

Make sure the sink is level.

4 SECURE THE SINK TO THE WALL

Insert the Expansion Bolts through the brackets into the wall.

Tighten the bolts with a screwdriver or wrench until the sink is securely fixed to the wall.

5 CONNECT PLUMBING AND CHECK

Connect the drain and faucet according to the product instructions.

Turn on the water supply and check for any leaks.

Apply silicone sealant around the back edge if needed.

INSTALLATION CHECKLIST

- ☒ The sink is level.
- ☒ All screws are tightened.
- ☒ The sink is securely mounted to the wall.
- ☒ The drain and water connections are leak-free.

NOTICE

- Do not over-tighten the screws.
- Periodically check that all screws remain tight.
- If you are unsure about the installation, please contact a professional.
