

## parts list

## installation instructions

1. Remove all the accessories and sort them into categories according to the number of each item.

2. Remove the rod at the top which has the wiring bundle. Pass the wiring bundle through one of the individual rods and the base one by one, and then tighten the rod by rotating it.

3. Insert the end interface of the wire bundle with a plug through the circular hole beneath the base, tie it into a knot to secure it, and then connect the two ends of the controller to the top wire bundle and the plug wire bundle respectively.

4. Stand up the installed pole and start installing the butterfly part. Take one half of the wing and fix it with screws at the top connector. Then, install all the wings in sequence.
