25

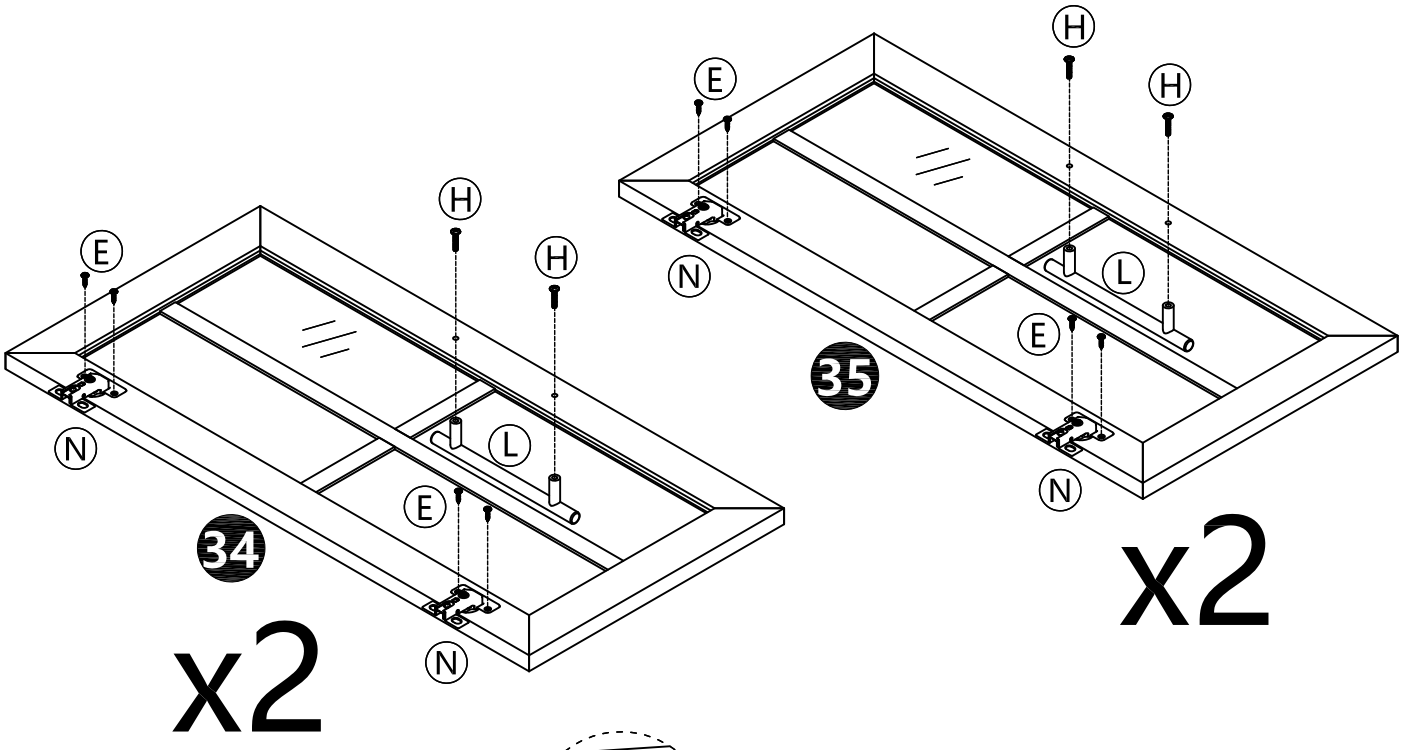

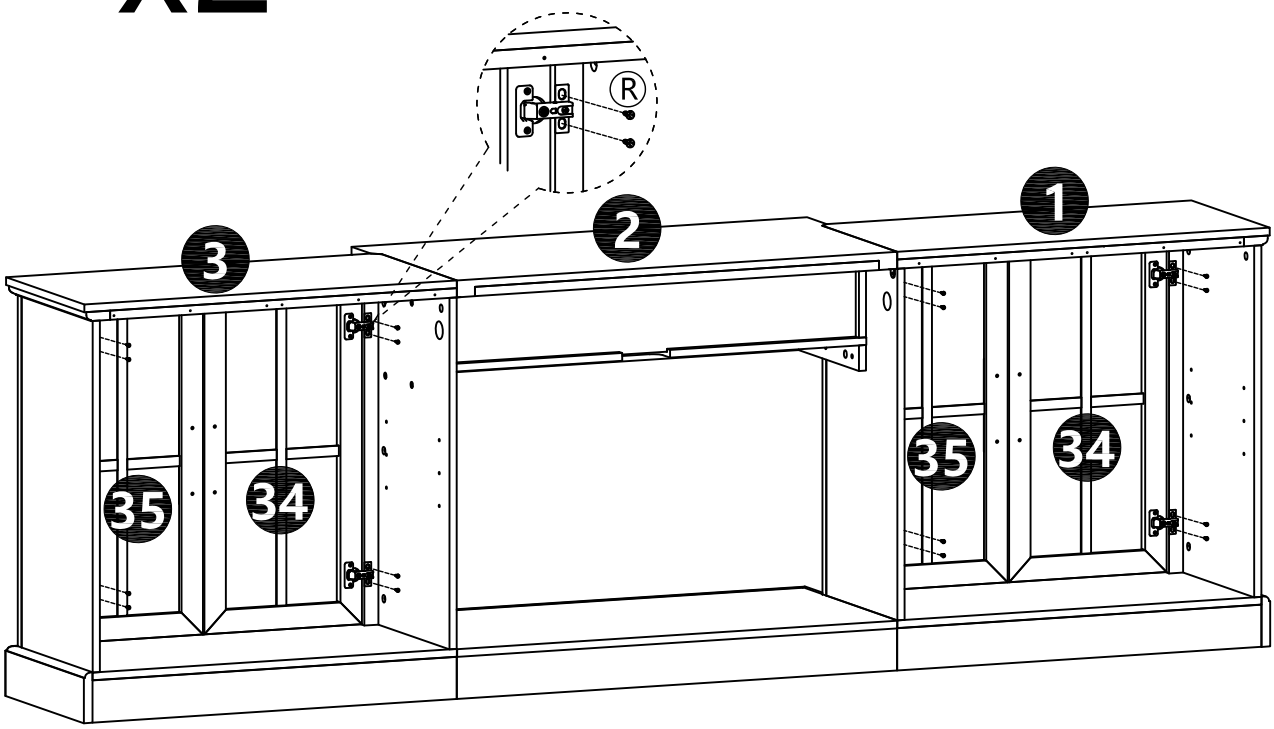

After tightening the screws, the two people stood the cabinet upright.

26

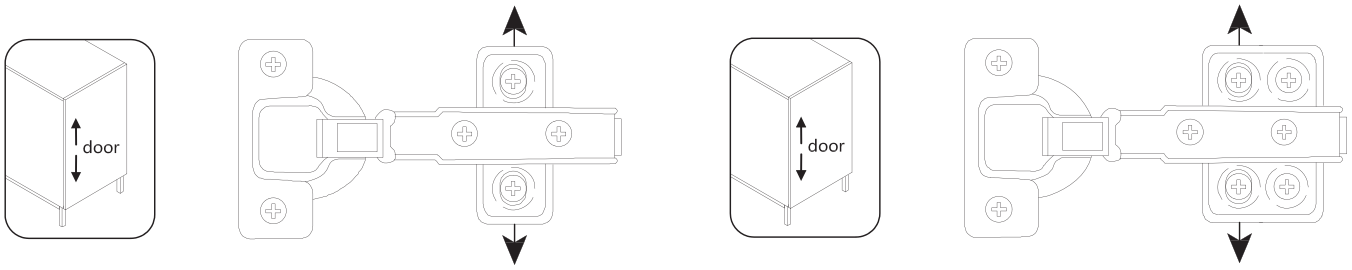

After installing the cabinet doors and adjusting the gaps between them to ensure they are even, proceed to the next step of installation.

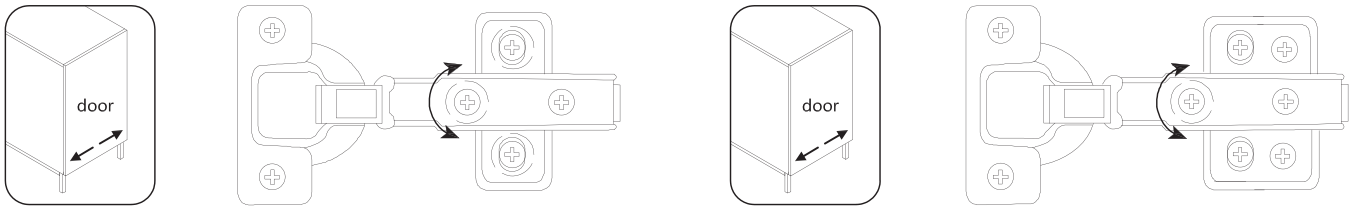

27

When the door of the cabinet is too high or too low

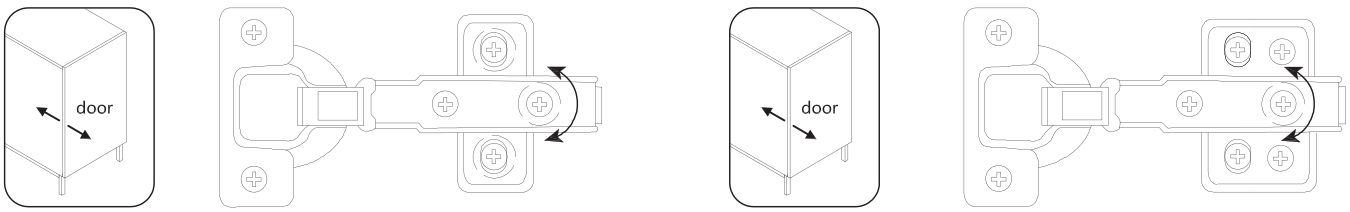

Loosen the height screws, then move the door up or down to make it level and then tighten the screws.

When the four sides of the cabinet door are not flush with the cabinet.

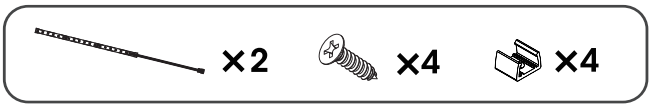

Adjust the lateral screws. Rotate the screws clockwise to increase the gap of the hinge, and rotate the screws counterclockwise to reduce the gap of the hinge until the four sides of the cabinet door are flush with the cabinet body.

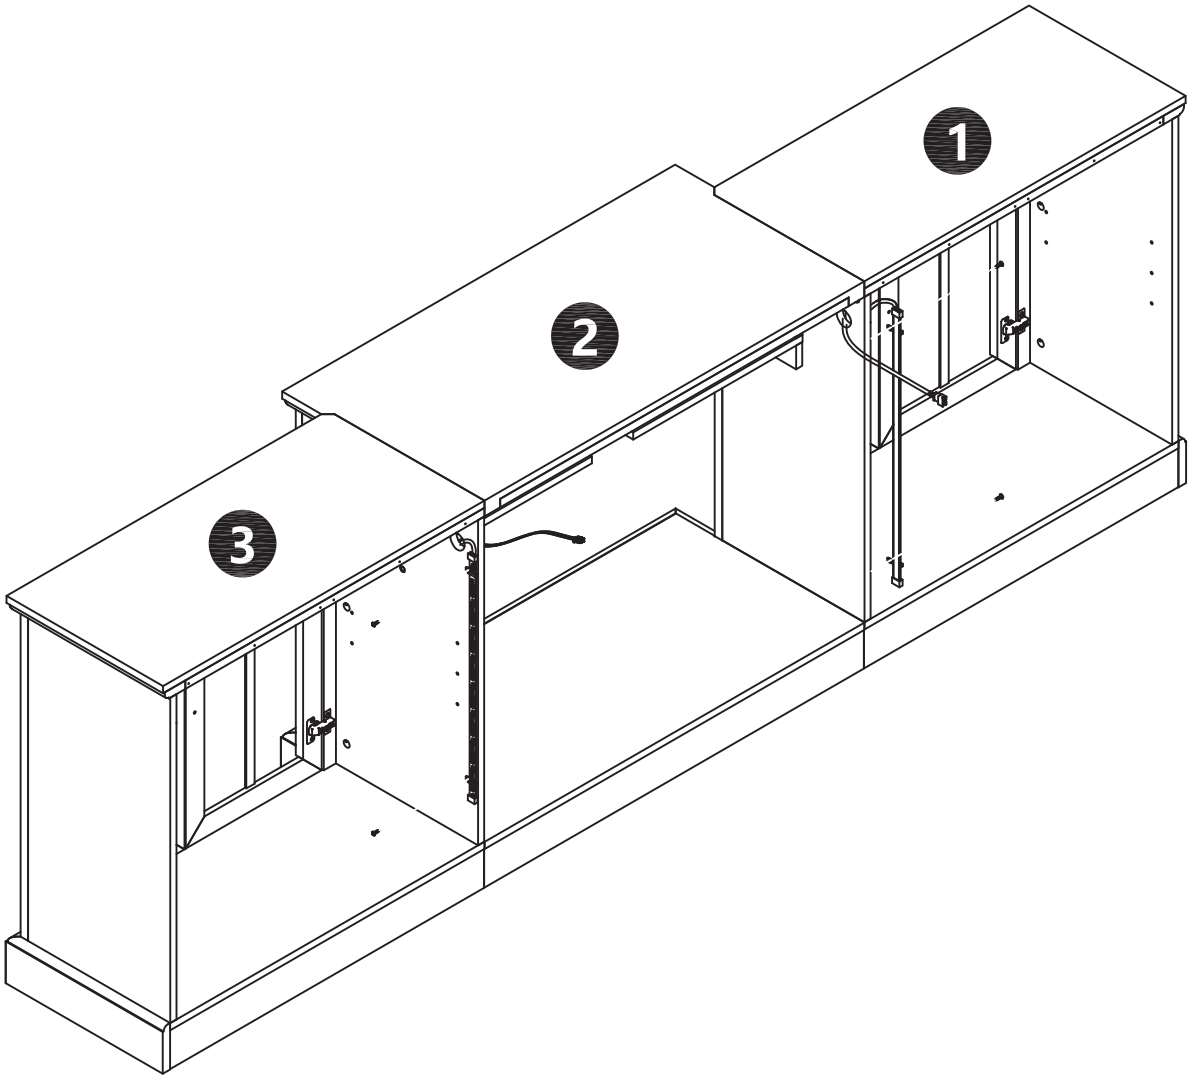

When the gap between the position of the cabinet door hinge and the cabinet is either too large or too small.

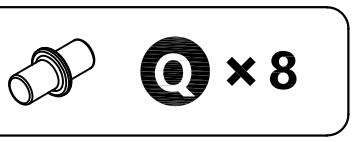

Loosen the in-and-out screws, adjust the gap between the door and the cabinet to make it even, and then tighten the screws.
