Step 16

②  x3

Step 17

②  x12

Thread the wire end through the hole.

Step 18

3

x2

Thread the wire end through the hole.

Step 19

5  x2

Step 20

Step 21

Step 22

Step 23

- 7 x2
- x2
- x2

Step 24

use a ruler to measure the approximate height of the product on the wall, and then mark it with a pencil.

Put the expansion bolt into the hole.

Pass the matching screws through the "anti-rewind" and tighten them to fix them on the wall.

Use a tape drill to make holes in the wall that are suitable for the product screws.

User's Guide

Thank you for purchasing this product. To use this product, please plug it into a 12V DC power supply. Please use if the product works normally after connecting to power.

Introduction

The box is an intelligent controller with 2 touch buttons. It can turn ON/OFF the light, change light colors, and adjust the light luminance.

Product Show

ATTENTION PLEASE

1. If there is no touch response suddenly, Re-plug the power to reset the touch static electricity.
2. If bubbles appear on the panel, remove the protective film.

Operation

This touch button is used to turn on/off, change colors, and adjust brightness.

- A. Short touch -> lighting on -> short touch -> change light color -> short touch -> change light color -> short touch -> lighting off. B. Long touch -> adjust the luminance

This touch button is used to turn on/off the induction function.

- A. Short touch to turn on the induction function. It can auto-turn on the light when people are close to the controller in 1 meters. It can auto power off the light when the body is far away from the controller after 30 seconds.
- B. Long touch to turn off the induction function.
- C. Note: When you touch the light button to change the light modes, the induction function will automatically turn off. It is best to turn on this function after selecting the light color and adjusting the brightness you want.
