#### ARRANGE PARTS INTO GROUPS AS LISTED IN YOUR PACK CONTENTS UNFOLD COVER AND PUT TO ONE SIDE

#### 4x**D** 8x**E** 8x**8** 4x**Z** 6x**4** 2x**1** 12x**3**

Assemble the base with the above parts.

Once base is assembled build upwards using the parts listed in step 2.

#### 8xE 4xB 6x4 4xZ 12x3 8x8

This forms the next level.

Once completed build the next level with parts listed in Step 3.

#### 2xB 2xD 8xE 8x8 6x4 8x3 4xZ

This forms the next level.

Once completed build the next level with parts listed in Step 4.

STEP 4

#### 4xA 2xC 1x1 2x4 4x8 6x5 2xE

This forms the next level.

Once completed build the next level with parts listed in Step 5.

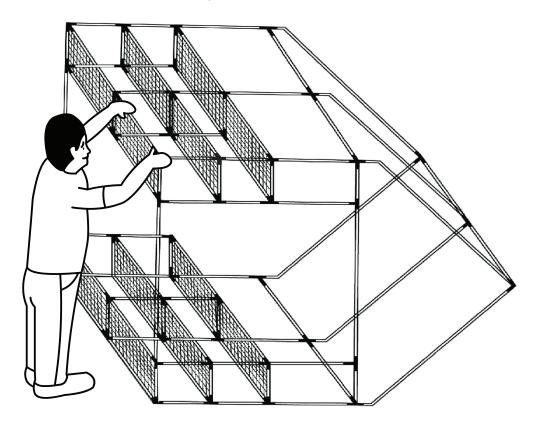

#### 2x**J** 1x**H** 1x**Y** 2x**8**

This forms the next level.

Once completed, place the cover (Y) over the frame and attach.

STEP 6

Once assembly is complete you will need to tighten the frame by pushing down on two rods at a time, forcing them closer together. (Repeat from all angles, as shown in the picture below.) This will result in a tighter and smaller frame, enabling the greenhouse cover to slide easily over the frame.

# **Anchor kit Assembly Instructions**

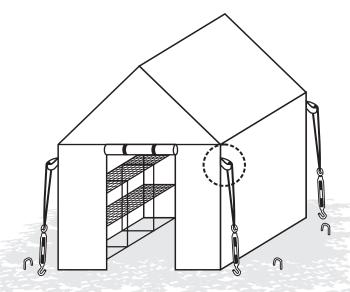

**NOTE:** Please make sure to unzip the door cover prior to sliding over frame, failure to do so may cause damage to the cover.

### Step 1

Hammer the anchors into the soil, placing them on all four sides of the greenhouse.

### Step 2

Connect the top end of the rope into the strap on the top of the greenhouse for all 4 sides as image shown.

### Step 3

Take the other end of the rope and pass it through the bended side of anchor as shown in figure.
Repeat the step for all 4 sides.
