

## Mounting Instructions

Your Michael Healy doorbell ringer is designed to quickly and easily replace your existing doorbell.

1. Turn off the power to your existing doorbell. Remove your current doorbell button and disconnect the two wires.

2. Using the supplied screw, attach your new mounting bracket to the doorjamb pulling the wires through the large buttonhole in the mounting bracket. (Note: Some designs require the removal of the body of the doorbell ringer from the mounting bracket before the bracket can be attached to the wall. The body is attached to the mounting bracket with a single screw.)

3. Attach one wire to each terminal on the new doorbell button and push the button into the mounting bracket. (Note: It does not matter which wire is attached to which terminal)

4. If required, reattach the body of the doorbell to the mounting bracket and return power to the doorbell.

## Frequently Asked Questions

Does my doorbell ringer require special care?

We coat each doorbell ringer with a clear, catalyzed polyurethane. This protective finish is similar to the clear top coat on an automobile. Washing of your doorbell ringer with a mild soap and water will help to maintain its vibrant shine. Occasionally coating the doorbell ringer with car wax will greatly extend the life of the original finish. Do not use a brass cleaner or an abrasive pad as these will damage the clear coating and the original polished finish.

I live near the beach. Will one finish last longer than the others?

All Michael Healy Doorbell Ringers receive the same protective coating. If properly cared for, there will be little difference in the durability of the various finishes.

What can I do if my doorbell ringer tarnishes?

Even though Michael Healy Doorbell Ringers are coated with a clear catalyzed, polyurethane finish, copper alloys will patina with time. Age and the environment may change the appearance of your doorbell ringer. While some prefer this natural aging process, our refinishing program gives you the option of restoring your doorbell ringer to look like new. Simply ask about our refinishing program.
