## Endeavor 1

D2537S50738-4060

Endeavor 1 is an evocative, large-scale work on canvas that pays homage to the mixed-media masterpieces of Robert Rauschenberg, most notably his iconic "Bed, 1955." Exhibiting a similar revolutionary impetus, Endeavor 1 transforms the canvas into a space for nuanced commentary, inviting the viewer to question their perceptions of traditional art mediums and techniques. Several elements come together here that cleverly toy with the viewer's perspective and conventions of depth perception. Though this work is two-dimensional, there is an intriguing spatial three-dimensional illusion in the center of the piece that is both tangible and ethereal. The disparate color scheme in pale yellow, graphite, sky blue, sage, and vermilion contributes emotional depth to this striking work.

A clever use of depth in Endeavor 1 bridges the gap between art and life in this exclusive addition to ART by TA.
