

Double Trash Assembly

Use the below QR code for assembly instructions:

<https://youtu.be/N-VLekgW0Hs>

Tips for assembly:

- Watch the video fully through at least one time to familiarize yourself with the process.
- Review the parts list included.
- Assemble on a soft surface like a blanket. The surface should be flat.
- Pause or rewind the video as necessary.
- Using a lower torque setting on your drill is a must.
- The drill bit insertion should be at an angle. Going straight in is not advised. See the video.
- Gently tilt the connector tool (like a drill bit) to the side to dislodge easier. See the video.
- Do not force the screw into the connector. If your angle is not correct, back out the screw and try again.
- Once the item is assembled be sure to add your felt pads to any doors or drawers. Pads go in the upper corner.
- Two people may make assembly easier.
- **Always anchor any furniture to the wall to prevent tipping. There are mounting holes on all cabinets.**
