USB CHARGING CABLE	**1**

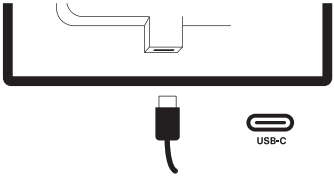

02 **DEVICE OVERVIEW**

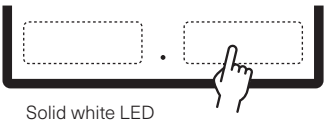

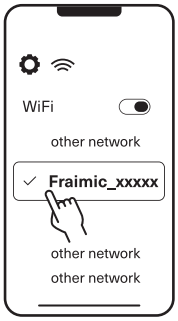

03 **SETUP & ONBOARDING**

1. **PLUG IN** and charge your Fraimic. Battery indicates fully charged when LED is solid green.

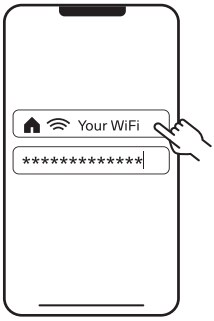

2. **TAP** the mat to wake the device

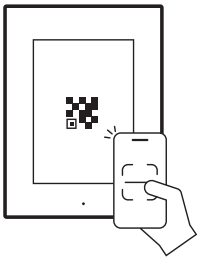

3. **JOIN** the “Fraimic_XXXXX” WiFi network

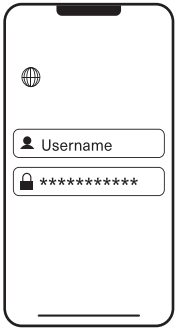

4. The authentication portal will automatically load, **SELECT** your home WiFi network and **ENTER** the password.

PLEASE NOTE: Fraimic follows standard iOT device protocol by operating over 2.4GHz WiFi.

5 Fraimic's screen will update with a QR code. **SCAN** the QR code. (https://fraimic.local)

6 On your device, **CREATE** a Fraimic account

7 **VERIFY** your email address.

Confirmed

The verification email may take a minute to arrive. If you don't see it, check your spam folder and verify the email address you created your account with.

8 **UPLOAD OR CREATE** your first artwork and enjoy ultra-low-power, long-lasting display.

04 **OPERATION**

CHARGING

Green LED shows charging status

Blinking = Charging

Solid = Full

Full charge supports multiple years of static display time.

LED INDICATORS

WHITE solid: Device is awake, ready

WHITE pulsing: Processing/installing

RED solid: Recording

RED blinking: Error/failure; Failure to connect to internet

YELLOW blinking 3x: Recording/upload canceled

MAGENTA blinking: Firmware update downloading

GREEN blinking: Charging

GREEN solid: Charged

FRAIMIC DASHBOARD

Accessing your Fraimic dashboard is quick and easy with no app installation required.

- Go to app.fraimic.com
- If you're not already logged in, click "Sign in" and provide your credentials
- From the Fraimic dashboard, you're able to:
  - Upload images
  - Add or create albums for scheduled image updates
  - Manage account settings
  - Check battery status
  - Access Fraimic Styles
  - View your previously uploaded or generated images

For more information on how to use the Fraimic web app, please visit **fraimic.com/support**

05 **CREATING WITH FRAIMIC**

UPLOAD IMAGE

Uploading an image from your phone or computer is possible without the need for an app.

1. Go to app.fraimic.com and **LOGIN**.
2. **CLICK** “Select” next to Upload Image.
3. **SELECT** the image you’d like to upload on your device.
4. **TAP** the corner of the mat on the Fraimic you’d like the image to be sent to.
5. A solid white LED will appear before becoming a pulsing white LED.
6. Wait ~ 30 sec for your image to appear.

VOICE-TO-VISION

Generating creative images with Fraimic is simple

1. **TAP** the mat once in the indicated location to wake the device– a solid white LED will show.
2. **TAP** the mat once more in the indicated location – wait for a solid red LED.
3. **DESCRIBE** the image you'd like to generate by speaking towards the microphone.
4. **TAP** the mat once again to end the recording.
5. A pulsing white LED will indicate that the image is processing. (~ 1 min)

Once the image is ready, the LED will blink green and turn off.

3x to cancel

You can cancel a Voice-to-Vision creation at anytime by triple tapping on the indicated touch area and the LED will blink yellow 3 times – this function is unavailable during canvas refreshes.

06 **GET THE BEST RESULTS**

VOICE-TO-VISION TIPS

Fraimic intelligently interprets your voice prompt to get you an artistic image without needing to iterate over and over. Even so, it's helpful to consider your prompt carefully to get the most true to your vision result.

Be specific
Include style, mood, subject, and composition in every prompt.

Use visually descriptive adjectives
"Warm," "cinematic," "minimalist," "vibrant," etc.

Specify the medium
Oil, watercolor, mixed-media collage, detailed pencil sketch, 35mm film photo, etc.

Describe the style
"An impressionist oil painting of a...", "an abstract expressionist mixed-media painting of a..." etc.

Define the composition
Centered portrait, wide landscape, macro detail, "...as part of a larger composition," visually balanced, etc.

EXAMPLE PROMPTS

"A muted watercolor of a serene Japanese garden at dusk with one vibrant pop of color."

"Minimalist gestural line drawing of a human figure in motion."

"Modern geometric abstract collage art using teal, tan, and black as the main color scheme."

"A 35mm film photograph of a cinematic nighttime cityscape with reflections."

"A retro neon airbrush painting of a Swiss mountain landscape."

FRAIMIC STYLES

Fraimic includes curated style templates to use with your creations. In your Account Settings, select a Frame and you can pick from a handful of different artistic styles that can be applied to your Voice-to-Vision creations. Selecting 'None' will not apply any style to your image.

HOW IT WORKS

1. **In Account Settings**, select the Frame that you want to use.
2. **Pick a style** from the available options.
3. On your Fraimic, complete the standard **Voice-to-Vision** creation process.
4. Your Fraimic will now automatically apply your Fraimic Style to your creations.

AI IMAGE CREATION CREDITS

Each Fraimic account includes **100 free AI image creations per year.** Credits do not roll over and are replenished on the one-year anniversary of your device activation.

Credits are used only for creating new AI images. Uploading and displaying personal photos or artwork is always free.

Additional credits can be purchased anytime through the Settings section at **app.fraimic.com**

CUSTOMER SERVICE

ONE-YEAR WARRANTY for any manufacturing defects.

Fraimic is always undergoing extensive testing, and will implement an over-the-air (OTA) update system to promptly address and fix any software issues.
