

Pet water & food dispenser

Components

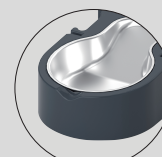

1-water tank

2-water bowl

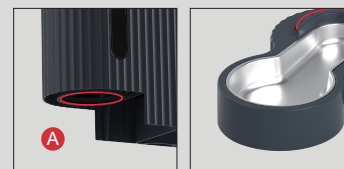

3-main body

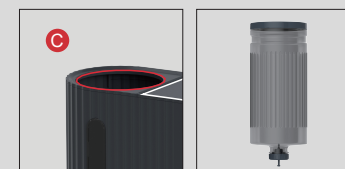

4-food bowl

Installment Steps

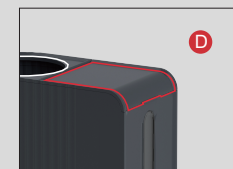

- STEP 1: Install the water bowl**
 As shown in the figure above, the color marking position of part A should be aligned with the color marking position of water bowl, and slightly press down. When the clip is inserted into the slot correctly, you will hear a slight sound.

- STEP 3: Install the water tank**
 Set the water tank down along the circular C inlet at the top of main body.

- STEP 2: Install the food bowl**
 As shown in the figure above, the color marking position of part B should be aligned with the white color marking position of part food bowl, and slightly press down till the clip is inserted into the bottom of slot.

- STEP 4: Load grain**
 See the D (Food Container) of main body in the figure above. Open the lid and put in the grain, and then close the lid.
