

How To Install A Shelf On A Wall

Tools and materials (not included):

- * Drywall anchors & Screws
- * Pencil
- * Standard level
- * Hammer
- * Screwdriver or cordless drill
- * Tape measure

Steps:

1. Determine the placement

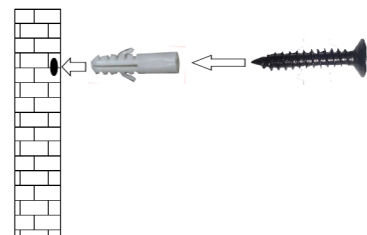

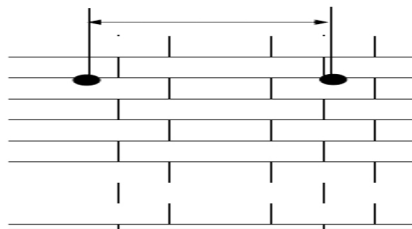

2. Measure the distance between mounting holes on the rear of shelf.

(Tip: please measure from the center of each keyhole slot.)

3. Test-fit wall anchor, ensure the screw heads will fit into the keyhole bracket slots.

4. Use pencil and level to mark mounting hole line and screw points

5. Install wall anchors and screws

A) Drill starter hole (a hole smaller than the anchor)

B) Tap anchor in with a hammer to seat prongs into wall

C) Insert the screw and slowly screw it in.

D) Ensure each screw is fully tightened but not over-tightened, back them out so the heads extend out 1/8 inch to 1/4 inch to fit into their respective mounting hole slots.

6. Tidy the pencil marking and drywall dust.

7. Hang the shelf
