Application

It can be used for student housing, apartments, motels, RVs, camping, homes, dorms, etc. It is ideal for frequent travelers, business travelers, renters, and families with babies, pets, and sick people.

Notes

1. This is an **electric-free** dehydrator and cannot wash clothes.
2. The amount of laundry to be dehydrated depends on the size, saturation, and thickness of the laundry.
3. Rotation speed depends on the operator's strength and speed of operation.
4. It is recommended that different types of clothes should be washed separately for cleaner results.
5. Please allow the slight color difference caused by the shooting light and 1-3cm error due to manual measurement, and make sure you do not mind before you order.
